### QUEBEC CHURCH IS ALARMED BY LIQUORQUESTION

Roman Catholic Prelate Forbids Clandestine Importation of Alcohol

GOVERNMENT STYLED A SALOON KEEPER

Churchmen Say Their Attitude Is One of Favoring Voluntary Abstinence

Because of the persistence with which the wets in the United States have put forward the system of liquor control in certain provinces in Canada as a model, The Chris-tian Science Monitor recently sent a staff correspondent to the border to make an investigation of condi-tions there. The result of his inves-tigation appears in a series of articles of which the present is the

QUEBEC (Staff Correspondence)

The Roman Catholic hierarchy of French-Canadian Quebec is growing visibly concerned at the increased drinking developing in the Province under the system of Government control of liquor, according to ob-servers here. Official pronouncements from the highest prelates in the Province are condemning drunk-enness, urging total abstinence and pointing to the need of reviving dormant temperance societies within mant temperance societies within the church. Furthermore the evil of illicit manufacture of intoxicants and bootlegging have been so roundly denounced by Papal authorities as to have attracted attention throughout the Province in ecclesiastical and lay circles alike. The church's increased concern in this direction is declared by those who have followed developments under Quebec Government liquor under Quebec Government liquor control to be the natural outgrowth of the growing consumption of liquor under this system.

"By virtue of our pastoral authority," declared Cardinal Begin in a letter and synodal decree, "we have prohibited and do prohibit under pain of grave disobedience, the fabrication, sale and clandestine: importation of intoxicating liquors, such as are already forbidden by the civil law." den by the civil law.

Effect Will Be Far-Reaching

The effect of this and other such instructions on a Province, the instructions on a Province, the ma-jority of whose people are French-spraking, is I kely to be far-reachsignificated to the causes which bring such expressions forth. It is impossible to get a complete picture of Quebec under its control system without a frank discussion of the part played in it by the dominant church. It is commonly felt that if the boasted success of the system of government liquor control were really stopping bootlegging and lessening the consumption of alcohol, the recent admonitions of the church would be unnecessary. As a matter of fact, Quebec's liquor bill has rapidly increased, and there are signs that the Cathol'c hierarchy, which cannot be accused of lacking the ambition for French Canadians to play an important rôle in the developing it is believed. Comment is being directed to the causes which bring such expressions forth. It is imposan important rôle in the developof Canada, are growing and at the inroads of alcohol in

Volume of Sales Increase According to figures of the Quebec Liquor Commission, in its last printed report (Montreal, 1925), the volume of sales of hard spirits and wines increased from 1,407,830 gallons in 1923-24 to 1,440,075 gallons in 1925, "showing an improvement," in the words of the commission "of 32,245 gallons." At the same time the "improvement" in the production of beer showed an increase of exactly 1,000,000 gallons, the report states, in the same 12 months.

tates, in the same 12 months.

### COUNCIL HEARS OF CONGESTION AT COURTHOUSE

Acts as County Commissioners in Seeking Registrar of Deeds' Advice

Continuing its purpose to exercise full power as County Commissioners of Suffolk County, the Council's Committee on County Accounts which is considering the need for a new courthouse had before it this afternoon William T. A. Fitzgerald, registrar of deeds, who described the congestion and lack of accommodations for conveyancers and the general public so

r as his office is concerned. The registrar of deeds said that while there is desk room in the of-fices of the Registry of Deeds for but 156 conveyancers at one time, there are as a rule about 500 trying to transact ...eir busine ; there. He said practically the same conditions exist in his office concerning other persons was resort constantly to the registry for research or for making

Mr. Fitzgerald said that this lack of facilities and room for the transac-tion of business is costly to the public as well as to the legal practition ers and recommended building on the north end of the roof of the court-house an addition to the registry which could be given dimensions to provide 5000 feet of additional floor space, or a 50 per cent expansion in scating capacity. He said the increase in records each year necessitated the removal of tables, two tables a year, each accommodating 24 persons at a time.

Councilmen Give Views

### DECLARES CHILDREN REFLECT COMMUNITY

Parent - Teachers' Congress Head Points to Duty

CHAUTAUQUA. N. Y., July 21 (Special)—Children draw their patterns not only from their parents, but from all the citizens of the comnunity with whom they come in contact, Mrs. H. A. Reeve, president of the National Congress of Parents and Teachers, said in an address here on "the children's challenge to the citizens," declaring that the challenge was a direct one to each member of the community, whether

## Character Built in Home Called Best Bar to Crime ASKED TO HELP

Police Chiefs of Nation in Convention Agree That Prevention Begins With the Child

Special from Monitor Bureau CHICAGO, July 21-Character is built on strength and influence of the home. Civilization is based on character, and the corner stone of the lans home is character. Without it civilization fails. Schools, boys' and girls' clubs, and all other progressive or-ganizations must increase their aid n crime prevention.

That, in substance, was part of the message presented by Duncan Mathewson, chief of detectives of the San Francisco police department, in an address here to the thirty-third annual convention of the International Association of Chiefs of Police

Mr. Mathewson's own system of dealing with crime, he explained, is in working earnestly toward preven-tion. He recommended establishment of bureaus in cities to work con-stantly to correct criminal tendencies. Disapproval of a practice prevailing in various places of accepting court testimony from so called experts, was expressed by

The Matter of Enforcement

Morgan A. Collins, superintendent of police of Chicago, a vice-president of the National Association, asked whether in his judgment prohibition has caused a decrease of crime in Chicago, replied that a chief of police should not discuss whether a certain law has or has not improved condi-tions. But he said every law enforce-ment officer took oath to enforce law and should do so regardless of what law it is. That is the policy that actuates the operations of the police department of this city, he declared. Gen, Milton A. Rockord, secretary of the National Rifle Association to Washington, asked the association to indorse and promote a universal pistol bill which was adopted at a recent meeting of the rifle association in Denver. He said that this bill has already been approved by the Ameri-can Bar Association. An objective of the National Crime Commission of the National Crime Commission and the Association of Markamen is to have every state adopt legislation restricting and controlling the manufacture, sale, distribution, possession of, and use of firearms of all kinds. He advocated licensing of certain persons to possess pistols or other firearms.

Seek Ald from Outside

Seek Ald from Outside The association also listened to a suggestion from one of its members that certain outstanding persons who

The address was one of a group in the parent-teachers day program of "women's responsibility for America" week. Mrs. Reeve outlined seven points on which we are being challenged by the child, the most commanding, in her opinion, being the matter of the use of leisure, in which their elders are sorely deficient.

We have the capacity to absorb tremendous amount of entertainment but we do not make enough out of it ourselves, her and, urging that more effort be spent in such things as pageantry and drama, so as to build up a more healthy "orm of amusement for our children.

Miss Marths Berry, Gunder and director of the Berry School of Mt.
Berry, G., gave an outline of the history of the school and its accomplishments.

## Governor Completes Board for Larger Water Supply ACROSS CHANNEL

Joseph H. Soliday and Charles M. Davenport Added to Commission on Goodenough Plan

The special commission established for Savings and since 1920 he has it the last session of the state Leg-leture for enlarging the water supat the last session of the state Legislature for enlarging the water supply of the Worcester and the metropolitan district under the provisions of the so-called Goodnough plan, was completed today when Governor Fuller appointed Joseph H. Soliday of Dedham and Charles M. Davenport,

a Boston attorney, as members.
Under the provisions of the water
supply law, the chairman of the
Metropolitan District Commission. Davis B. Keniston of Boston, is the third member and chairman. The "Goodnough" law was passed by the Legislature, largely through

the recommendations of X. II. Good-nough, chief engineer of the Depart-ment of Health, who for years has been making a study of the problems of water supply.

The "Goodnough plan" provides for the addition of 33,000,000 gallons

a day to the Wachusett reservoir through which the metropolitan district receives its water by drawing from the flood flows of the Ware River at Colebrook. It is estimated that the work will cost \$12,000,000 and require from four to five years for its completion. The appropriation provided is \$15,000,000.

Worcester Provided For

Worcester's water shortage is pro-vided for under the terms of the plan by awarding to that city per-manent right to take 10,000,000 galmanent right to take 10,000,000 gal-lons of water a day from Quinapoxet River, which is one of the tribu-taries of the Wachusett system. Worcester, for this concession, is to pay \$1,000,000 to the metropolitan

Besides authorizing neasures to dviert the flood waters of the Ware River, the law authorizes the taking River, the law authorizes the taking of land in the valley of the Swift River in some half-dozen of small towns and proposes the later development of a large reservoir in the Swift River Valley. This later plan was considered by the Goodnough report to the Legislature of 1922 to comprehend the ultimate solution of the water supply problems of Greater Boston.

The Swift River development is

The Swift River development is to be started at such time as the commission deems necessary. This project will entail an estimated expenditure of about \$48,000,000, so that the total cost of the combined enterprise will be about \$60,000,000.

The special commission is required to bring in plans within one year

to bring in plans within one year looking to the Swift River extension. It is directed under the law to make the construction of Colebrook on the Ware River of such plan that it can later be used as part of the larger construction when the Swift River is brought into the system.

This commission is provided with extraordinary powers for the construction and the taking of land for future construction. It may move highways or railroads, buy or take by other arrangement either permanently or temporarily such lands as its needs. It is given the authority to declare that an emergency exists to declare that an emergency exists and take all steps it deems necessary to complete the contemplated water

Mr. Davenport and Soliday are appointed for five years, at a salary of \$4000 each. Mr. Keniston will receive \$2500 a year in addition to his present salary.

Mr. Davenport and Mr. Soliday are appointed for five years, at a salary of offices at 53 State Street, Boston. He prepared for college at Greenfield, Mass., high school and was graduated from Williams College in the class of 1961. ## ASK PRESIDENT TO GIVE WORLD RIGHT DRY IDEA

Women Say Impression Is Given That Nation Is Powerless to Enforce Laws

EAST NORTHFIELD, Mass., July 21 (A)-A formal declaration by night by delegates of the Women's Inter-denominational Foreign Mis-

inter-denominational Foreign Mission conference on the eve of their departure for home today.

"In view of the persistent, widespread propaganda aimed at the annulment of the Eighteenth Amendment to our Constitution," the adopted resolution read, "we urge a clear attenty attement from our clear, strong statement from our President as to the possibility of enforcing law based on the Consti-tution, and the willingness and determination of our Government to cor-rect the impression which is being given to the Nation and the world that this Republic is powerless to enforce its righteous laws."

The 1500 delegates, representing 10 denominations of the eastern states, yoted unanimously for the adoution.

denominations of the eastern states, voted unanimously for the adoption.

Mrs. Henry W. Peabody, president of the Women's National Committee for Law Enforcement, and chairman of the conference last night, declared in submitting the resolution that great investments in the foreign that great investments in the foreign mission field were jeopardized by the propaganda reaching them that the constitution was being flouted in the United States. She called on Christian women to elect a majority in the fall which will prevent overthrow of the amendment.

### STRONG FARM RELIEF MEASURE PREDICTED

Senator, who was an outstandingaupporter of the Administration's agricultural program in the recent congress, declared the movement to strengthen the steps already taken would be along economic lines with apecial attention to co-operative marketing and then only in ways that experience with the present legislation demonstrated to be wise.

Senator Fess believes there will be no serious movement in the West against the tariff, for, he said, 32 per cent of the farm products are sold in this country and the West is dependent upon the purchasing power of the East, which needs tariff protection to prosper. Paricularly in some atates like lows where mortgage indebtedness is heavy and the banks have loaned on inflated values, he added, bankers as well as farmers a coloking for relief and both are advocating flat methods. But like the free silver movement of 1896, he said, this will not go very far.

If a friendly organ employs such language it may be imagined what fulminations are to be found in unfriendly organs. But indeed, not merely the press is excited. In Parliament there is a state of unprecedented ebullition. Party discipline may command a favorable vote, but it is certain that there is general blame for M. Herriot's undesirable enterprise.

The public generally, for the first time, seems to be awake to the financial difficulties and is betraying exasperation, anger and consternation. The barometer which exists in the shape of the exchange rate of the franc issues an urgent warning.

Must Proceed Quickly
All this explains why the Cabinet, in spite of internal dissensions, has decided to reduce the delay to a minimum and make its declaration will be abort, and it is hoped the financial project will be deposited. It is no ural that Anatole de Monise in formine has

Press Opposes Herriot as He Faces Chamber By SISLEY HUDDLESTON

By Special Cable PARIS, July 21-Pressed by grave vents, the Herriot Cabinet suddenly decided to precipitate its appearance before the Chamber, and this afternoon faced Parliament. Sobriety of language never was so necessary, and many rumors of the wildes character should be dismissed. It would be wrong to endeavor to cast would be wrong to endeavor to cast a horoscope of the new Government, but, nevertheless, whatever its fate, whether it falls today or in a few days, it is certain that in his long political experience of France the correspondent of The Christian Science Monitor cannot remember such widespread condemnation of any ministry.

The press is almost unanimously

Senator Fess Says Step Will be on Economic Lines

PAUL SMITHS, N. Y., July 21 (AP)

—Predicting that there would be a move in the next Congress to strengthen what already has been done by the Administration for farm rellef, Simeon D. Fess (R.), Senator from Ohio, left White Pine Camp to day, after a visit with President now appears senseless. The press is almost unanimously

now appears senseless. Warning From Exchange Ocuvre asks what strange camarilla has misled M. Herriot and made of his idealism a most terrible arm against the republic.

Must Proceed Quickly

All this explains why the Cabinet, in spite of internal dissensions, has decided to reduce the delay to a minimum and make its declaration today. The declaration will be sbort, and it is hoped the financial project will be deposited. It is natural that Anatole de Monize, in forming his plans, should encounter opposition. Talk of a forced consolidation of the floating debt, that is to say nonpayment of mature bonds, has done much harm and an agitation also has sprung up regarding the alleged possibility of a capital levy.

It is essential that the country be calm, for problems which are unquestionably serious are only rendered more arduous by the credulous acceptance of extravagantly erroneous statements. In any case, it is necessary to proceed quickly and whether he can find means for preventing a further plunge of the franc. In the event of his failure, it is believed in political circles that a cabinet of national union, presided over by Raymond Poincare, will become indispensable.

## SUPER-HIGHWAY LINK TO CHICAGO SEEMS ASSURED

Milwaukee's Plans for 160-Express Road Take More Definite Shape

MILWAUKEE (Special Correspondence)—Plans for a proposed superhighway, 160 feet wide, connect

superhighway, 160 feet wide, connecting Milwaukee and Chicago, are assuming more definite form as the result of a conference held at Kenosha, at which engineers from five cities discussed traffic problems along the North Shore.

If built according to present plans, the new trafficway will be the first of its kind in the United States linking two such large cities. The route is certain to be the most direct possible and one which shail be chosen for extremely high speed, convenience and comfort of motorists, If built according to present plans, the new trafficway will be the first of its kind in the United States linking two such large cities. The route is certain to be the most direct possible and one which shail be chosen for extremely high speed, convenience and comfort of motorists, avoiding as far as possible smaller cities along the way.

### What the Road Means

With a short, swift concrete link between Wisconsin's chief city and the metropolis of Illinois and the middle West, Milwaukeeaus may motor to Chicago in a little more than an hour. Chicagoans and tour ists from the south and southwest of-doors region and the lake country in the northern part of the State, or vice-versa, welcome the proposed speed road. Motoring directly from one city to another, tourists will not be compelled to pass through count-less municipalities along the way, and their trips will be made with more comfort, backers of the project

more comfort, backers of the project declare. With Milwaukee County and Wis-consin state highway authorities consin state highway authorities Moslem and Buddhist religions. The leading in the movement, assurances of co-operation were given at Kenosha by other governmental units interested in the venture.

A committee was apprised.

A committee was appointed, con-sisting of J. T. Donaghey, Wisconsin state highway engineer, chairman; W. F. Cavanaugh, Milwaukee county W. F. Cavanaugh, Milwaukee county highway commissioner, secretary; Frank T. Sheets, Illinois state highway engineer; John F. Herzog, Kenosha County highway commissioner; E. R. Fisher, Racine County highway commissioner; R. M. Lobdell, Waukegan; Robert Kingery, secretary of the Chicago Regional Planning Association, and the highway commissioner of Cook County, Ill.

### To Confer on Definite Plans

This committee will meet July 29 the offices of the Regional Planning Association, Chicago, where width and plans will be defi-decided. The committee's ap-l recommendations will be subproved recommendations will be sub-mitted to the highway committees of all counties interested at a later meeting. When these have approved the project will be submitted to the county boards and the state bigbway commissions for similar action.

Milwaukee County officials agreed

at the recent meeting that Wiscon at the recent meeting that Wisconsin's end of the highway should follow state highway 57, which now is the most direct road to Chicago. Liberal Party in connection with the Just what route will be followed south of the Illinois-Wisconsin State limitation of £20,000 is recembling will be decided at the meeting July 29. Milwaukee County officials indicate the belief that an unequal already have taken steps to acquire property necessary for a 180-foot road, and the speed with which the project gets under way depends on similar action by Racine and Kenosha Countles and by Illinois units.

### WORLD STATES TO DISCUSS ALCOHOL

Delegates Assemble in Annual Convention in Estonia

By Special Cable

TARTU, Estonia, July 21-Delegates from the majority of European countries and the United States are attending the eighteenth International Congress against Alcohol which has opened here. The specia feature of this year's deliberations is the attitude, not of the Christian churches toward the temperance movement, but also the Jewish,

be devoted chiefly to the attitude of doctors toward the alcohol menace. On Friday there will be papers on alcohol as the cause of accidents, alcoholism and poor relief, and a general discussion on the medical, letterical and excited aspects of the general discussion on the medical, historical and tactical aspects of the problem. Saturday morning will be given up to the churches' attitude toward alcohol and the afternoon to alcohol and young people; Monday, agriculture and abstinence reform; Tuesday, local option; Wednesday, enforcement of prohibition in the United States; Thursday, the last day of the congress, alcohol and the army.

army.

In addition to this fixed program, considerable attention is expected to be given to the question of liquor

### INHERITANCE LIMIT

PROPOSED IN BRITAIN By Cable from Monitor Burens:

LONDON, July 21-A definite fimit to the amount receivable by inheritance is recommended, as a remended. The pointons summarised indicate the belief that an unequal distribution of wealth is undesirable. distribution of wealth is undesirable, both on economic and social grounds, but it is also shown that it is difficult to say how far inequality of opportunity is the result of inheritance of property and how far it is the result of inheritance of position.

The conclusion is reached that a limitation of bequests would do much to level up the present differences between the rich and those who rely on their own efforts.

### NEW STEP TAKEN TO AID MOTORIST

American Legislators' Association to Seek Uniform State Motor Laws

DENVER, Colo., July 21 (Special) Legislative agitation for the passage of uniform state laws governing notor vehicles, with particular apsuit from the initial national meeting of the American Legislators Association which ended with the adoption of a constitution and by laws, and the election of officers and di-

John H. Voorhees of South Dakota, chairman of the Legislative committee of the National Conference on Uniform State Laws, lead the dis-cussion upon the need for uniform motor vehicle regulations.

motor vehicle regulations.

"Due to the present situation in which many states have motor vehicle laws that conflict with those of other states, it is easy for a person to break the law in one state while complying with that in his own," he declared. "Endless confusion results from such conflict and hampers the development of automobile transportation and the establishment of more cordial interstate relations. Hard feeling cannot but result when another state prosecutes a motorist for doing the things the laws of his state do not require to do."

do."

In discussing the proposed uniform federal tax lien registration act as framed by the National Conference on Uniform State Laws recently. Franklin E. Edmonds of Pennsylvania took occasion to say that "the inheritance tax in the United States has become a nuisance tax." He said nurther:

mate source of revenue for the atate, but it has become a burden, due to the variety and complexity of numerous state laws. At present practically every state has its own tax system and many of them vary widely. The solution of the problem is to establish a system of reciprocity between the states. Each should agree not to tax the citizens of another in return for a counter agreement by the other states to do likewise."

wise."

Henry W. Toll, Colgrado State Senator and organizer of the association, was elected the first president. Other officers chosen were George Woodward, State Senator in Pennsylvania, first vice-president, and Alfred Thwing, Minnesota, second vice-president.

and Alfred Thwing, Minnesota, second vice-president.
Directors elected were: B. R. Coulter, Nebraska; Thomas W. O'Donell, Utah; J. L. Robbins, South Dakota; Horace W. Schantz, Pannsylvania; Fred C. Hardy, California; W. J. Paul, Montana; G. B. Utter, Rhode Island; J. W. Halgis, Massachusetts; C. C. Bottom, Ohio; Edgar W. Waybright, Florida; N. J. Jackson, West Virginia, and E. B. Searcy, Illinois.

## FAMOUS TRAIL NOW CONCRETE

Road Lincoln Trod to Petersburg, Ill., From Salem, Completed

PETERSBURG, Ill., July 21 (P)-A dusty road over which Abraham Lincoin trudged nearly every day of six of the most formative years of his life, is now covered with concrete, and is due to be dedicated by the

and is due to be dedicated by the citizens of Petersburg.

From Petersburg, which Lincoln surveyed and named, to Old Salem Park, on the site of New Salem, is about 1½ miles. After surveying it in 1836, Lincoln named the town Petersburg for Peter Lukins.

Petersburg for Peter Lukins.
Lincoln came to New Salem in
1831, two years after the post office
had been established. Here he was
a storekeeper, postmaster and surveyor, Ann Rutledge, his first sweetheart, lived here; and at the Rutledge Inn, her home, Lincoln lived
while in New Salem.
Since the formation of the Old
Salem Lincoln League, New Salem,
now called Old Salem, has been undergoing rejuvenation. Houses and

plication to automobiles traveling dergoing rejuvenation. Houses and from state to state, promises to re-suit from the initial national meet-ing of the American Legislators Asold settlers' memories can make

them.
Visitors to the Old Salem Park, now state-owned, find Rutledge Inn as it appeared in Lincoln's day; Offut's store, in which Lincoln was first employed; the Berry and Lincoln grocery, in which Lincoln almost went bankrupt; and the Hill store, where he worked after that disaster.

### LOAN SOCIETIES ASKED TO HELP

of rural families living under condi-tions that are scarcely better," Dr. Ford said.

"Our own observations confirm these reports, for in practically every city and rural county there are ugly, unsanitary dwellings, un-sightly premises which are shocking to see—a drag upon the progress of our Nation."

Attempts to Meet Situation Dr. Ford said that in the many attempts, local and national in their scope, that have been made in recent years to meet this situation, very important contributions have been made by the federal and state departments of agriculture, the United States public health service, the National Housing Association, housing and soning commissions and organizations of builders and manufac-

the one nundredth anniversary of the founding of the first building and loan association of the country, you will have done much to promote home ownership. I am particularly interested in what the census of 1930 ments" as the candid Quebec Liquo will show.
"You recall, no doubt, that the per-Commission offers, there is evidence "You recall, no doubt, that the per-centage of families owning their homes in this country in 1900 was 46.1 per cent; in 1910 it was 45.8 per cent and in 1920 it was 45.6 per cent. We were falling back in what was most essential not only for the happi-ness of our people, but for stability. Your activities in the last five years have just about doubled and it is my belief that the census of 1930 will that 'ecclesiastical alarm has been roused. The following expressions testify to this feeling. For example, Cardinal Begin's letter, mentioned

above, said in part:
. "There is also another perversion cating drinks.

"You know what a vigorous battle we have fought for the virtue of

show the results of your work and that of other associations engaged in promoting home ownership." temperance in our diocese, our be A plea to increase home cwnership.
A plea to increase home cwnership throughout the world as a means of furthering world peace was made by Miss Anne Rae of Niagara Falls, past loved coadjutor and the group of ecclesiastical and lay apostles who aided him in his efforts. After about aided hm in his efforts. After about 15 years of work they had almost conquered the enemy, and we were overjoyed in foreseeing the end of the destruction caused by the excesses of alcohol. But, alas, there is now spreading everywhere the intolerable abuse which we denounce, and, in particular, the surreptitious fabrication of an alcohol more harmful than any other to the health of "If we can make the people of all nunciation of alcohol made by Cardinal Began with an equally strong admonition that his followers support the work of the Black Cross.

In the letter, the illicit manufacture of alcohol is particularly conwhich attacks the living forces of the individual, of the family, and of society, and which, if we do not strongly react, will soon accomplish irretrievable ruin."

French Paper's Ylews

In unciation of alcohol made by Cardinal Regan with an equally strong admonition that his followers support the work of the Black Cross.

In the letter, the illicit manufacture of alcohol is particularly considers. It is expected to pass without difficulty, however, as the present agricultural housing conditions made of the precepts of church fathers in favor of abstinence, the Black Cross group is highly praired for improving them. countries of the world home owners, struggle and strife will disappear from the face of the earth," Miss Rae "Thoughts of war are not born around the fireside. The greatest duty that confronts the Government of any nation consist of anchoring the people to the country in which they reside and in assisting them in which their their own homes."

owning their own homes."

Miss Rae appealed to the building and loan officials to lend a sympa-L'Action Catholique, a leading and loan officials to lend a sympa-thetic ear to the financial wants of the American farmer. She said that inasmuch as 50 per cent of the de-nosits of building and loan associa-tions came from the rural districts it behooves the leaders of the build-ing and loan movement to assist in financing those engaged in agricul-tural production. French newspaper partly owned by SUCCESSFUL TRIAL OF the church of the Province, is published in this city, and expresses strong temperance senti ments. Father E. LaVergne, an editor of the paper, has made fervent appeals for total abstinence. He is quoted as saying to a newspaper financing those engagement of the large from the large from the American home. Judge Frank T. Wilson of Stillwater, Minn., secretary and treasurer of the Minnesota State League of Local Building and Loan Associations, told the dele-

correspondent, regarding Government liquor control:

"In the old days the liquor business was despised and looked down upon, but now the Government has become a saloon-keeper and that has made it respectable in the eyes of "Not in houses or caves or cliff many. Now there is no shame in being a barrender; it is a Government job, like being a postmaster or cus-

"Not in houses or caves or cliff dwellings in the skyscrapers which flank the canyons of great cities, but in the modest cottages with vinecial porches, shaded lawns and sunny gardens," he said, "Homes where the child may find God in the open places, and by doing its bit of service in helping father and mother in the daily tasks, learning by doing that "he profits most who serves best." toms officer.

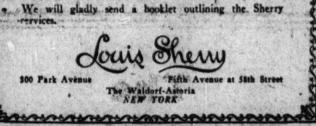

"With due respect to those at the head of our Government, I must say that since they have become the advocates of beer and boose, and have put the seal of Government approval upon drinking they have almost annihilated the work of the church through years of preaching temperance and sobriety."

### MACDONALD FOR SELF-DISCIPLINE

British Ex-Prime Minister Delivers Stirring Address to Christian Endeavorers

By Cable from Monitor Bureau LONDON, July 21-Christian Endeavorers to the number of 14,000 from 30 countries, on the closing day of the world convention of that organization, thronged the huge cener transept of the Crystal Palace to hear Ramsay MacDonald, ex-Prime Minister, expound his views on "Statesmanship and Secret of Power," which he said was the re-

sult of character and self-discipline. The audience included a number of Germans whose choir of about 50 voices roused the other delegates to enthusiasm by their singing. "A few years ago," Mr. MacDonald said, "those people who had ventured to use the expression our German friends would have suffered severely. None of them is either afraid or ashamed to use that expression to-

upon taking the chair. In the course of his remarks he said that the first problem in statesmanship was not in-ternational or national, it was personal. The man who was a great statesman began by mastering him-

Necessity of Discipline

"You can bob about on beauti-Tul little wavelets that dance and foam on the margin of the sea," he continued, "and the sun can flash upon you and children can enjoy your bobbing, but in an hour you are a wreck on the sand. You are doomed; your faith is the sand, not the harbor. That life which is a suc-cess is not the life which is spent bobbing on the margins of existence but on the high seas, in the deep waters with its compass, its chart and its plan; life with its discipline, life with its obedience to higher life with its obedience to higher things, life that is steered steadily and consistently to harbor; We have to fashion ourselves by discipline, by doing hard things. Our youth toby doing nard things. Our youth to-day, perhaps more than ever on ac-count of the misery wrought upon the world very largely by the failure of the churches themselves, requires discipline more severe and drastic than has been called for by any gen-eration in the past century. We want acts not words; every act strength-ens. Every word unsupported by an act weakens. Words, mere pious words, with scent and savor in them, but no substance, soften our moral being. They deteriorate it, they make men lasy. Do not be misled by merely beautiful language Rugged, honest, strong, powerful, faithful yet humble acts—that is what we have to try to achieve, in order to make our lives worthy." The Youth of Germany

The Rev. G. Schurmann said the German delegates saw in the hearty welcome they had received an indi cation of brotherhood. They took the hand extended to them willingly and they believed the bond between them would in the future be stronger than human imperfections. Herr Schur-mann spoke of the growth of the Christian spirit among the youth of

The Rev. Ira Landreth of America in an address on "The Youth of World for Sobriety," said the American churches believed that prohibition at its worst was better than license at its best. American drink used to be a traffic; today it was a crime. When they made it a crime they started the beginning of the end of that iniquity. "When we got prohibition," he added, "our opponents were politically inside and we were outside. Now we are politically inside and they are outside—we hung them there to are outside. them there to dry." He asked the people of the British churches to determine that their flag should not fly over piracy on the American seas.

Chivalry of Youth In an address on "The youth of the world for urity," the Rev. I. that youth had exhibited marvelous chivalry in the war and there was appeal to them today to sh.w chiralry in other directions. One of the greatest gifts contemporary youth could offer to Christ was a life dedicated to the interests of purity— purity in social relationship, in

### HOUSES AT LOWER PRICES BY MASS OUTPUT FORECAST

Contractors Differ as to Degree of Quantity Production Applicable to Distinctive Building, but Agree as to Many Inefficiencies of Present System

manufacture is possible, Henry Ford labor saving machines, such as is quoted as saying, but all architects and builders are not ready to spraying outfits, and the like." agree yet. Even with mass produc-tion, it is pointed out that each one could be guite distinctive and different simply by interchanging and adapting units from a hundred dif-

machinery, painted wall boards for ceilings, as well as walls instead of lath, plaster and paper; window frames and casings ready made, and painting are combined in the plan for quantity building

Many contractors agree that the present system in many ways is inefficient, costly and contrary to the ideas and methods of the times. Many see a tendency toward quantity production methods in modified degree.

Henry R. Brigham, president of

ideas and methods of the times. Many see a tendency toward quantity production methods in modified degree. Henry R. Brigham, president of the Housing Company, 40 Central Street, Boston, manufacturers of house materials, said:

"There is no doubt that the common method of building one house at a time is most uneconomical, and that the better builders of today by quantity production are building quantity production are building houses for considerably less than they can be duplicated by the in-dividual method. The man today who builds a quantity of houses at once can save on legal fees in title ex-amination, on architects fees, and on costs of financing; can save by buying materials in quantity, and can save very appreciably on labor costs by so managing the building of his houses as to keep all his labor employed all the time.

### Rating for Construction

"The better builders, however, have to compete with the shoddy builders whose finished products when new may look as well or better than the better built houses, and the difference in real values may not be discernible for several years. Such competition causes people to be competition causes people to be skeptical regarding all houses built to sell and discourages honest build-ers by making it possible for the un-scrupulous man to undersell him and still profit.

"It is because of this situation that the leading real estate developers of the country favor a system of rating of houses by responsible com-panies, formed for such purpose, which will watch construction and give certificates as to quality of con-

"If such a system of rating should "If such a system of rating should be established, better building by professional builders would be more encouraged, the suspicion of a 'house built to sell' could be overcome, and the individual wishing a house could the individual wishing a house could buy with confidence a new well-built house cheaper than he could reproduce it. In fact, he could huy it so much cheaper that he would prefer to buy it 'ready made' than to pay the additional amount necessary to have the various individual changes in construction which he would in construction which he would wish if building for himself. "That would give the better build-

ers increased business, and every increase in business would give them correspondingly greater opportuni-ties for more economies in construc-

"The extent to which those eco-nomies might be carried is very large. More standardization of design without necessarily too great uniformity in appearance could easily be accomplished by adopting a standard unit of design and construction. Standardization of materials likewise offers endless opportunities.

tion. Standardization of materials likewise offers endless opportunities.

Labor Cost Reduction

"As a builder's business grows he might then manufacture larger sections of buildings ready to yut in place than can be done today with the lack of uniform building units and lack of standardization of labout one-third of an acre of land. The purchaser is Helen F. MacNabb.

duce the amount of labor required on the job which would mean more 'avings than could ever be possible by mere reduction in costs of materials.

"Labor is the great cost of construction. It is not amount the daily wage as the problem of keeping all men employed."

"Entry the mount of the daily wage as the problem of keeping all men employed." "Labor is the great cost of construction. It is not a much the amount of the daily wage as the problem of keeping all men employed all the time. That might make it possible to reduce the daily wages but raise the annual wages. Besides leveling out the peaks of the construction industry so to to keep men employed all the year, the man steadily building quantities of houses and with good management keep his men steadily working every day they are employed, which means great savings even if daily wages are not reduced. "When a man is building one house at a time there are many days and boars of labor paid for when all the laborer gives in return is his time. That is not necessarily the fault of the laborer, but may be caused by one group of mechanics ha ir constitution mortages and money above the first mortages very often seeming exorbitant. Often they are acorbitant for the second mortages were for some buyers and are well located and designed and the financing is alt manded through one competent agency the risk can be much reduced with corresponding reductions in rates of interest.

"This could be done by the building company or by second mortages companies founded on a sound basis backed by men of unquestioned in rates of interest.

COURT UPHOLDS
GOV. BREWSTER

Appointment of Sheriff
Eastman in Kennebec
County Sustained

Augusta, Me, July 21 (AP)—In a decision given yesterday, Associate Justice Dunn of the Supreme Court upholds the legality of the appointment of John M. Eastman of Bentom as sheriff of Kennebec County. The opinion is given in the quo warranto proceedings instituted by former by the Governor with the advice and constituted and powers of John M. Eastman of Bentom as sheriff of Kennebec County. The opinion is given in the quo warranto proceedings instituted by former of the county of the advice and constituted and constitution of the subject of the charge, but whoily for the public good, after the manner defined by the organic law itself, as that law stands expounded and constitutional construction by the majority made an opinion which was commanding on Governor Brewster in dealing with Sheriff Cummings.

"The recent constitutional construction by the majority made an opinion which was commanding on Governor Brewster in dealing with Sheriff Cummings.

"The recent constitutional construction by the majority made an opinion which was commanding on Governor Brewster in dealing with Sheriff Cummings.

"The recent constitutional construction by the majority made an opinion which was commanding on Governor Brewster in dealing with Sheriff Cummings." Daniel Lyne has purchased the estate at 76 Beacon Street, Chestnut Hill, consisting of a 12-room brick residence with four baths, two-car garage, and a half acre of land, opposite the Reservoir. Adelph I. Dinner was the grantor. The property is valued at \$45,000.

Anthony E. Zalvis has sold his colonial nine-room house located at colonial nine-room house located at service with the sastement of John M. Eastman, the defendant in the country. The third of the country with the advice and rome of the country with the advice and consent of the country. The property is valued at \$45,000.

Anthony E. Zalvis has sold his colonial nine-room house located at gime.

In arguments maintaining Mr Cummings was illegally removed, counsel stressed the point that the Governor had no right to break a three-three tie of the council. Justice Dunn affirms the findings of a majority of the justices of the Supreme Court, who in an advisory opinion declared the Governor was within

the rule where parties are at suit the sheriff has neither liberty nor

### SPRINGFIELD SAVINGS DEPOSITS INCREASE

### LEVIATHAN DOCKED FOR OVERHAULING

## Eastward Sailing Aug. 1

Aided by more than a dozen powerful harbor tugs, the United States Lines' flagship, Leviathan, floated

Lines' flagablp. Leviathan, floated slowly over the sill into the United States Navy's drydock in South Boaton- at flood tide at 7 o'clock this morning for the periodical overhauling of the vessel's underwater portion. Captain James A. Reed, coast pilot, brought the liner up from New York and at 11 o'clock last night dropped anchor inside the Graves and at daylight steamed up the bay. The log of the Leviathan shows the vessel to have had Castle Island on the port beam at 6:30 and resting on the blocks of the drydock at 1:30. Capt. A. T. Hunter came up with the Leviathan to superintend the everhauling work which will be done in the dock. Lieut. R. E. Daggett, U. S. N., directed the docking of the Leviathan in the interests of the Navy. Commander R. B. Hfilard, U. S. N., was an unofficial observer. Because of a scheduled sailing to the eastward on Aug. L. work will be earried on here day and night with the utmost speed, and to carry out this plan visitors will not be permitted, however, to watch the proceedings of drawing the lail shafts. lowering new screws into place and the general everhauling from the edge of the dock. They may also watch the process of floating from the edge of the dock. They may also watch the process of floating from the edge of the dock. They may also watch the process of floating from the edge of the dock. They may also watch the process of floating from the edge of the dock. PORTLAND, Me., July 20 (Special) The Portland Art Museum is displaying for a few weeks the portrait slowly over the sill into the United of Percival P. Baxter, former Gov-

# this work they will conduct at the university a state leaders' raining course from Aug. 17 to 20 in connection with the annual Farmers' and Home-Makers' Week. "Over 1000 men and women in the State," says J. C. Kendall, director, "are serving as voluntary local 1 ders. The successful development of our extension projects is largely due to their efforts. It seems most important that at some time during the year such leaders come together to discuss the many problems of common interest and to plan for future development.

FARM LEADERS

BEING TRAINED

New Hampshire University Extension Service Busy

**During Summer Months** 

DURHAM, N. H., July 21 (A)-The future success of New Hampshire agriculture depends largely upon the

educating of leaders in modern farm methods in each community, the ex-

tension workers at the University of

New Hampshire believe. To aid in this work they will conduct at the

development.

"The alfaifa campaign, which has as its ultimate objective securing 100,000 acres of the crop in the State, is of such importance that we are planning to emphasize it particularly at the meetings of agricultural leaders. Other project leaders are invited to hold group meetings also."

The extension workers are busy likewise in sending out advice to the farmers for the summer months. They have told the dairymen that it seems good business to feed grain seems good business to feed grain liberally this summer because of lower prices than usual, a poor hay crop and prospects of better milk crop and prospects of better milk prices. They have advised thinning the apple crop to make it of better quality, have advised as to better arrangements of kitchens in farm homes and have radiocast many other valuable hints.

### HEARING ORDERED IN GASOLINE SUIT

### Restraint of Sale of Go-Gas Stations Sought

WORCESTER, Mass., July 21 (P)

Judge Winfred H. Whiting of the
Superior Court has ordered a hearing for July 23 at Boston on the bill
in equity filed in the Superior Court
hore by the Massachusetts Gas & Oil
Company.

The concern, incorporated as a
holding company representing 4000

The concern, incorporated as a holding company representing 4000 investors and approximately \$1.550,000 in invested funds, asks that the Go-Gas Campany be restrained from selling its filling stations to the Standard Oil Company unless that company agrees to continue the dividends promised the investors.

The bill also asks that the further sale of gasoline from these filling stations be prohibited unless provision is made for the promised dividend. It is claimed the investors did so ander the agreement that one cent from the money derived for each gallon of gasoline sold would be divided among the stockholders in the town or city where the station is located.

The Go-Gas Company operates 156 stations in Massachusetts, Connecticut, New York, New Jersey and Pennsylvania, The hill is signed by 60 stockholders.

Miners Line, Ready for Philadelphia Voyage

The new passenger and freight steamer, Dorchester, which was recently launched for the Merchants & Miners Transportation Company, will sail tomorrow evening for Philadelphia on its initial voyage. The vessel will be open for public inspection from 11 to 3 o'clock. Addition of the Dorchester to the line's continuous service between Boston and Philadelphia on Markey and Philadelphia on Markey and Might are set to be little the markey and th

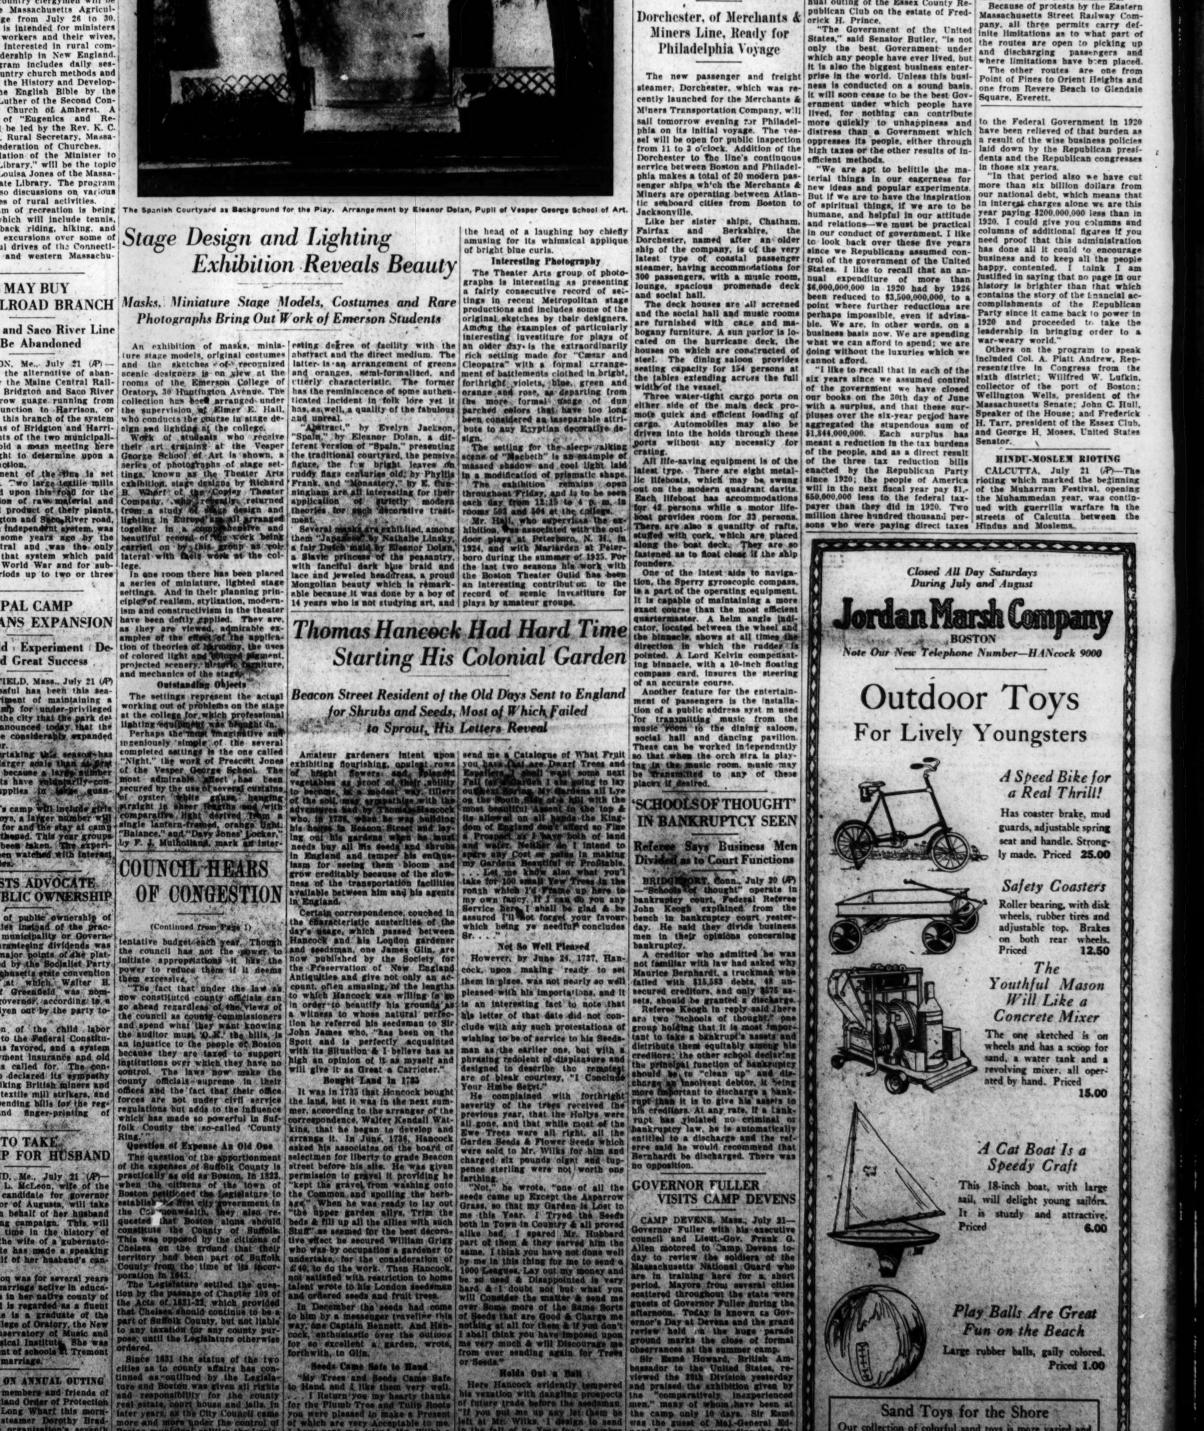

### REVERE MOTORBUS PERMITS GRANTED

Three Limited Lines Authorized by Utilities Board

The public utilities commissioners have granted to the Service Bus Company of Revere, certificates for three motorbus lines, applications for which have been before the com-

mission for some time.
One of the routes, which operated for a time under temporary certificate, is that from Revere Beach to North Revere, passing over part of Park Avenue. This is the route over which Alphonso Roberto, head of the Service Bus lines, has been operating free busses for some time, awaiting the decision of the commission. Because of protests by the Eastern

Massachusetts Street Railway Com-pany, all three permits carry def-inite limitations as to what part of the routes are open to picking up and discharging passengers and where limitations have been placed. The other routes are one from

agricultural commodities. This surplus sold in competition in the world's markets, sets the price on the whole output, so that our farmers are receiving the world's price for their commodities and not a protected American price.

Would Segregate Surplus

"It is easily understood that under these circumstances the tariff is largely inoperative. It is planned to segregate the surplus, sell it on the world's market or, as in the case of corn, withhold for a fairer price, and absorb the loss through a system of equalization fees to be borne by the producer.

Praising the administration of President Cooldge for its econspiculture, in the administration of the second the administration of the president Cooldge for its econspiculture, in the administration of the president Cooldge for its econspiculture, in the administration of the spread to espouse the cause of economic justice for agriculture, it is hard to believe he will remain observable.

Of William M. Jardine, Secretary of Agriculture, he said: "Much of the misconception regarding the plan of surplus conirol would have been avoided had the Secretary of Agriculture possessed a true understanding of the problems involved." Praising the administration of

## Summer Time in Washington

Washington

FEW senators and representatives are finishing up their work or are detained by personal reasons in Washington. Infrequently, politicians drop into the Republican and Democratic headquarters, respectively. A few newspaper correspondents have not gone to the ters, respectively. A few newspaper correspondents have not gone to the Adirondacks and two members of the

Adirondacks and two members of the Cabinet are in town.

This limited personnel affords opportunity for discussion of probable and possible candidates, policies and prospects. Probibition is still a crucial matter, and how the parties are going to line up on it is still not clearly defined. The edges are somewhat frayed from overhandling at present. Next to it as an issue, according to the discussions going on here, is the tariff, and there again there is more or less confusion. While the Democrats have been threatening to lay the agricultural ills at the door of protection, there are spots and classes in the Democratic South where the ideas of the tariff are different. The old Democratic lower. Cabinet are in town.

This limited personnel affords opportunity for discussion of probable
and possible candidates, policies and north. Later, she journeyed by train with Mrs. Willebrandt and Miss Matthews to the Bar Association meeting in Denver, going from there to California, which will probably be her future home.

meeting in Denver, going from there tariff are different. The old Democratic slogan of 'Tariff for revenue only' does not resound so whole-heartedly in these changing days as formerly.

Talk around Democratic head quarters tends to the conclusion that it would be safer to emphasize the tariff especially with many middle West Republicans believed to be willing to go Democratic as a rebuke to the administration. Long heads, however, are not carried away with that idea, desiring to await further developments. (It's a long way to '28," they murmur.

The Republicans are willing to go before the country on the tariff issue. Will R. Wood (R.), Representative from Indiana, chairman of the Congressional campaign committee, in a speech published in a late edition of the Congressional reampting committee, in a speech published in a late edition of the Congressional Record declared that the protective tariff stimulates foreign trade, that exports have little effect on farm prices and that industrial activity and domestic consumpt, on are essential to agricultural producers. All classes prosper under a protective tariff, he declared.

Many persons in official positions,

Many persons in official positions, when they retire to private life, continue to live in Washington, not only the lame ducks who get on boards or commissions but other who turn to business or retirement. A

## Friction Drive May Displace Gears in Future Motorcar

Three Rollers Within Tapering Steel Ring Prove Workable System in One English Machine

Automobile construction has been in a state of experimentation for some time, and from developments now in progress authorities believe that radical changes in the car of the future, perhaps lighter, easier of operation, and of greater fuel mileage, are impending. Discussing further probabilities of the ultimate automobile, The Christian Science Monitor today publishes an-other article which deals with the. possible climination of transmis-

tem of transmitting power by frictional adhesion between rotating surfaces which would seem to have ted, the farther will the ring float interesting possibilities for motor away from its central position and

rear wheels of a car and the driving wheels of a locomotive. In each of these instances it is the weight of the vehicle, holding the wheels to the road or rail, which enables sufficient adhesion to be obtained.

Used in English Car

The theory involved is simple. There are three rollers, one being the driver roller, the second the driven roller and the third the idler. tained. Surrounding them is a steel ring, the inner diameter of which is a few thousands of an inch smaller than If the surfaces are left "as ground"

the sum of the diameters of the three rollers, so that it has to be sprung into position, and thus produces a grip sufficient to cause one roller to drive another when the gear commences to revolve.

In order to produce the adhesion required for the transmission of useful power, however, a much greater grip is required, and this is automatically obtained as follows: rollers commence to revolve, the ring rotates and moves to an off cen-ter position under the influence of the forces applied. This movement For some time there has been in rocess of experiment a novel sys-

Smooth and Quiet

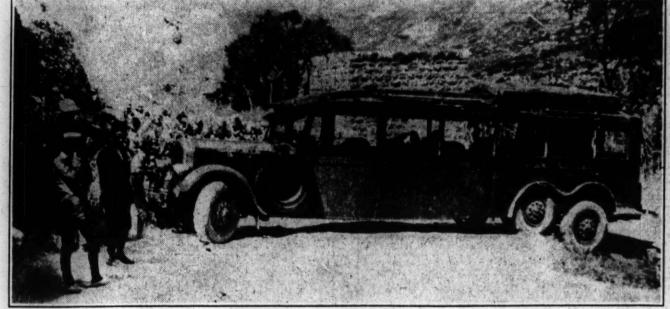

The greater the torque transmitthe greater will its grip on the Frictional adhesion is, of course, widely used for the transmission of power, everyday examples being the various members of the gear, so that various members of the gear, so that no forces are conveyed to the bearings in which the driving and driven shafts are carried. A heavy weight was applied to a small gear of this kind, but no slipping occurred at any point.

It must be understood that the re-Now, if the same idea be applied to duction obtained depends simply the transmission of power from one upon the relative diameters of the shaft to another through the medium driving and driven rollers, and any shaft to another through the medium of a pair of discs, pressed together and taking the place of toothed wheels, the difficulty found is to obtain sufficient cohesion without employing inordinately large forces to hold the discs together. This difficulty has been successfully overcome in the system known as the Garrard gear, which has been runing without trouble in an English car.

The theory involved is simple.

driving and driven rollers, and any ratio up to 10 to 1 can readily and efficiently be arranged. The power which can be dealt with by the gear distribution to the proposed supon the sizes of the parts, and it is, of course, possible to employ lengthy rollers and a number of retaining rings. The parts are all of hardened steel, running in oil, and the gears so far made have been constructed on a basis of allowing stresses only one-quarter of those commonly employed for ball and commonly employed for ball and roller bearings. Negligible wear and excellent reliability are thus ob-

ABGENTINE TURKEYS SAIL

## Midsummer Music

By ALBERT F. GILMORE

WHILE in the temperate zone
June is pre-eminently the
banner month for bird music,
yet May and July are not without
goodly measure of this tuncful joy.
I am writing on a day in early July,
sitting in the shade of a birch tree
on the corner of the lawn which
forms the setting of our cottage in
our little Maine valley.
All about are grass fields stretching away to the woods, not nearer
than a half-mile in any direction.
The upland meadows are thick with

vation of their movements, I am convinced that within 40 feet of my chair are two nests, safely hidden in the thick grass. In an amazingly short time, however, they have become accustomed to my presence and now are going and coming with their usual regularity. The male is still in full song. Every now and then he pauses to swing for a moment of the ten of the nearthy elements. ment on the top of the near-by elm, pouring out his tuneful melody with all the gusto of early June. The female in her soberly-striped dress four in a close bunch, the other sitting scolds a bit as she swings from the solitary, too independent, it seemed, grass tops, then drops down into the to accept intimate companionship scolds a bit as she swings from the solitary, too independent, it seemed to accept intimate companionship with his fellow-nestlings. Morning

of the summer chorus are making their presence known. Meadow larks still persist in their cheerful "spring-o'-the-year," and I see them in switt and direct flight, passing to and fro on errands domestic. They are among our most numerous dwellers in the summer fields, and they make most desirable neighbors. Sometimes in crossing a field, I come upon one slipping quietly through the grass, its plumage so nearly the color of the dry grass stalks as almost perfectly to conceal its presence. There are few better examples of color protection than that afforded by the meadow lark.

From the thick-topped maple in neighbor's dooryard at intervals comes the melodious warble of the purple finch, a faithful inhabitant of that favorite location for many years. During all the years I have passed in the little valley this delightful singer has selected the same nesting site. The notes of the warbling virco

comes the melodious warble of the purple finch, a faithful inhabitant of that favorite location for many years. During all the years I have passed in the little valley this delightful singer has selected the same nesting site. The notes of the warbling vireo are also occasionally on the air, coming from the rock maples back of neighbor's tarn. This too is a mest acceptable summer visitor. While it may not be so constant a singer as the purple finch, yet its warble is scarcely less melodious.

A Savannah sparrow undisturbed by my presence at intervals busily trills its insect-like notes from a low elm scarcely 20 feet distant, then dives into the grass where it, too, is rearing a brood. These sparrows are greatly increasing in numbers and where formerly they were quite scarce in this locality, now they are among the most numerous of the sparrows.

All about are grass fields stretching away to the woods, not nearer than a half-mile in any direction. The upland meadows are thick with generous crop of timothy, redtop enerous crop of timothy, redtop their coats of black and lemon-yellow. Perched on the bean poles, they low.

The upland meadows are thick with a generous crop of timothy, redtop and clover, abundantly sprinkled with the blossoms of many flowers, daisies, buttercups, purple iris along the brook, and orange and yellow hawkweed, or devil's paint brush. The sky is afloat with summer clouds, lazily crossing the sky under the impulse of a gentle west wind which wafts to me indescribable odors, the spice of the summer fields.

Spring-o'-the-Year

When I took my place under the birch, bobolinks began immediately to protest my presence. Their secret is out. Their young are hatched and the parent birds are busy enough in securing rations for the hungry mouths. Two pairs are close at hand, and after a few moments of observation of their movements, I am convinced that within 40 feet of my phair are two nexts safely bidden.

Phoebe is now busy with the hatching of her second brood in the nest on the back porch. Two weeks ago when we arrived at our cottage for a week-end, she had just led her brood of five sturdy youngsters out of the nest and was busily encouraging them on their first advantures into the world. At nightfall, their first night out of the nest, they perched on the low limb of a box-elder on the lawn, hidden away.

Meantime, many other members smartly swaying in a fresh wind of the summer chorus are making their presence known. Meadow larks their fluffy suits of Quaker brown:

Housed in a Chalet

te. The notes of the warbling vireo e also occasionally on the air, ming from the rock maples back neighbor's tarn. This too is a set acceptable summer visitor, thie it may not be so constant after as the purple sinch, yet its lable is scarcely less melodious. A Savamah sparrow undisturbed my presence at intervals busily ills its insect-like notes from a lown as carcely 20 feet distant, then we into the grass where it, too rearing a brood. These sparrows of the most numerous of the arrows.

Beet Tops for Goldfinches
From a little distance beyond the me wall which borders our gara, the song of a vesper sparrow occasionally heard. This is a set singer, with notes so closely morbing the familiar bars of the gaparow as to mislead one not lose listener. There is to the quick, howaver, a notable contrast, tile the song sparrow's notes are wrill with joy, jubilant and sparros, the vesper's song has a trace sadness, a shade of melancholy, ticularly, noticeable in its closing

### LOOP IS BEST COLLECTOR FOR USE ON TRAINS

### Installations Must Be Compact and Flexible to Be Practical

This is the second of a series of three articles by L. F. Plugge, giv-ing his experiences with a portable radio set on myoring trains while traveling around Europe. Mr. Plugge used a superheterodyne receiver, which seems to be the best sort of a set for this work up to the present stage of radio development. II

Great progress will certainly be made within the next few years in the construction of portable wireless receiving sets and the one I have been carrying might be de-scribed by some as being rather cumbersome. The set is a sevenvalve supersonic heterodyne, which works on a dry battery of 40 volts. The aerial is a noncollapsible frame, 15 inches in diameter with about 20 15 inches in diameter with about 20-turns. Specially designed leather cases were used to carry the set. They were three in all. One case housed the supersonic proper, the second the dry battery, and the third contained the frame aerial. The latter case was also fitted with pockets in which the headphones could be placed. It is most undesirable to carry a set on long-distance traveling which is meant to operate a loudspeaker. On such journeys, only headphone reception should be resorted to, as one would be liable with a loudspeaker to disturb other passengers. With headphones it is possible to listen as long as desired without disturbing anyone

The leather case in which the frame was housed had a special trap-door arranged at the lower end. This device was for allowing connection to be made to the main set without removing the aerial from the case. Wireless waves, as my readers know, find no difficulty in going through wood and leather or similar substances of that nature, and consequently the frame aerial was capable of receiving the station de-sired just as well while it was in the case as when the case was re-moved. In certain instances I did remove the frame from its housing, but more often I found that it was not worth while doing so.

I do not think that for reception on a moving train any set could be more suitable than the supersonic heterosuitable than the supersonic netero-dyne. Under the special conditions in which the listener is placed, it is indispensable in the first instance to have a set which can receive effec-tively on a frame. A frame is a com-pact instrument to handle and its use does not present much difficulty or inconvenience, especially when traveling on foreign trains, where compartments are as a rule fitted with a small table by the side of the window. This table provides in

noise blotting out reception altogether. This interference could with a small table by the side of the window. This table provides in many instances an excellent rest for the frame aerial.

That the receiver should be a very long range one is essential for obvious reasons. Among these we do not forget that traveling with a receiving set will more readily apply to long-distance travel when the passenger taken at his disposal, and such travel will take the passenger far from those countries in which his interest will remain. Again, it is always more interesting to be able to listen to the sadiocasting of one-sown country. While traveling in forcing lands, apart from the keeps one in touch with home. This only makes the whole experience the more wonderful.

What more thrilling sensation could one have than traveling between Rome and Naples at a speed of some 65 miles an hour and at the same time ilstening to the news of small some time ilstening to the news of the news of a fail travel, causes short-lawave distance travely when the passenger has a considerable time of leisure at his disposal, and such travel will take the passenger far from those countries in which his interest will remain. Again, it is always more interesting to be able to listen to the sadiocasting of one-sown country. While travelling in forcing lands, apart from the transmission agreeable, but only for those taken on the sadiocasting of one-sown country. While travelling in forcing lands, apart from the transmission shemselves, one likes to hold a link which keeps one in touch with home. This only makes the whole experience the more wonderful.

What more thrilling sensation could one have than traveling between Rome and Naples at a speed of some 65 miles an hour and at the same time ilstening to the new should be a manufacture of the provided provided the provided provided the provided provide

of some 65 miles an hour and at the same time listening to the news given out from Savoy Hill? This I accomplished with no more effort: However, I had meanwhile lost the news given out from Savoy Hill? This I accomplished with no more effort: than if I had been listening to it in my own flat in town and as clearly as if I had had the announcer himself sitting in the same compartment just opposite me and had heard all the latest London news from his own lips. Could a greater wonder be conceived? Such a thing is not an unsurmountable task to carry out provided the necessary permission has been obtained and the right kind of set is taken on the journey.

While on the subject of Italy, I should mention that I found the Italian trains the most suitable for reception. Several of the coaches on the Italian state railways are not convenient at present with a counted for this.

Or fail travel, causes short-wave disturble to the fleghboring ether. However, I had meanwhile lost the through the frame for accomplished with no more effort: However, I had meanwhile lost the fleghboring ether. However, I had meanwhile lost the frame for accomplished with no more effort in an unsurpountable task to carry out provided the necessary permission has been obtained and the right kind of set is taken on the journey.

While on the subject of Italy, I should mention that I found the Italian trains the most suitable for reception, Several of the coaches on the Italian state railways are not counted for this.

reception. Several of the coaches on the Italian state railways are not equipped at present with electricity, but are lit by gas. This is a great asset, as interference is in this way very much minimized, so much so in fact that while the Italian trains were moving at great speed it was fact that while the Italian trains were moving at great speed it was very difficult to recognize an, difference between reception then cotained, and reception when at a standstill. Another point that is important on this railway system is the size of the small window table to which I have previously referred. The tables provided in Italy are usually rather long and wide and this makes them very suitable for the frame aerial, as it permits orientation in the precise direction necessary for receiving the desired staticu. This is owing to the possibility of placing the base of the frame sufficiently far from the window to permit complete rotation.

I found that it was always possi-

I found that it was always possible to place the case containing the battery underneath my feet without its being in anybody's way. The main set was the most difficult part of the equipment to handle during reception, and I found it fairly convenient to hold it on the knees with the dials and tuning switches in front of me. If I was fortunate enough to be in a compartment partly occupied only, which was several times the case when I was traveling in Austria, I could place the instrument on the seat first alongside to where I was sitting. This proved to be an ideal position. Some of the best receptions which it has been my lot to obtain were made on the Compagnie du Nord in France and on the sleeping cars of the Compagnie du Nord in France and on the sleeping cars of the Compagnie hiterastication and the sleeping cars of the Compagnie du Nord in France and on the sleeping cars of the Compagnie hiterastication and the sleeping cars of the Compagnie du Nord in France on the Swedish State Railways between Gothen.

Wooden Panels Used on Short Waves

burg and Stockholm, exceptionally clear reception was also obtained and connection maintained during the whole journey both on short and long waves. On another Sweden line, however, between Velback and Malmo, I experienced considerable interference due to a dynamo which was situated apparently underneath the compariment in which I was situated apparently underneath the compariment in which I was situated apparently underneath as speed of approximately 10 miles an hour. When the train was proceeding below this speed, as would be taked a speed of approximately 10 miles an hour. When the train was proceeding below this speed, as would be the case on approaching or leaving a station, reception was perfect, and I could use the directional properties of the frame in order to secure

### PAN-EUROPEAN PLAN OPPOSED

Austrian Socialists Against Scheme of Coudenhove-Kalergi

VIENNA (Special Correspondence) Opposition to Count Richard Coudenhove-Kalergi's Pan-Europe proposal on the part of the Austrian Socialists has just been publicly expressed for the first time in their party organ, the Arbeiter Zeitung.

As the Socialists, or Social Democrats, represent almost half the political force in Austria, this stand against Pan-Europe has a certain importance. Count Coudenhove-Kalergi, although a Csech subject, has long made Vienna his home and crtainly the starting-point for the Pan-Europe movement. It is, therefore, understandable that he was desirous of rallying all parties in Austria to his support. That he will be disappointed at the Socialists' defection goes without saying, for, whatever he may believe to the contrary, it is regarded as a serious blow. crats, represent almost half the po-

blow.

Within Austria, it has been found possible to arouse the interest of a representative and distinguished group in Pan-Europe, drawn mainly, from the ranks of the Christian Secialists, or Clericals. In the same way, perhaps, the most prominent names among the adherents of the scheme in Germany are on the list of the Center, or Clerical, party. It remains to be seen whether the action of the Austrian Socialists will affect the opinions of Social Democrats in other countries. It may, indeed, prove to be purely a local position assumed by reason of internal differences between the Christian Socialists and Social Democrats. On the other hand, it may mark the beginning of a definite alignment among the proletarian classes of Europe against this form of union. At a dinner given here recently in honor of the visiting English playwright, John Galsworthy, Herr Carl Seltz, the Mayor of Vienna, spoke strongly of the need for closer co-operation among the European countries. It was to be inferred that the Socialists would favor a United States of Europe. He was speaking, incidentally, of Galsworthy's contribution to a better understanding of these nations, the one ambing the other. What, however, is objected to by the Socialista, according to the Arbeiter Zeitung, in Pan-Europe is the omission of Great Britain and Russia. It is also felt that Pan-Europe as conceived by Count Coudenhove-Kalergi would be a tool of capitalist interests rather than an organ of Socialists.

The Socialists here can foresee and salvation for Europe only when Socialist governments are in power in the constituent countries. As soon as that day arrives, union in Europe will be a simple matter. But, continues the Arbeiter Zeitung, it is unthinkable that Great Britain and Russia could then be left out, for they and their laboring classes belong to Europe and are needed in Enrope. Within Austria, ft has been found

### ZIONISTS REPORT ON COLONIZATION

Memorandum Shows Progress of Jewish Home in Palestine

\*Special from Monitor Bureau . LONDON—A memorandum by the Zionist organization has been laid before the League of Nations Permanent Mandates Commission. Although the Zionist organization has recognized status under the andate as the Jewish Agency for Palestine, it is not entitled to approach the League direct, and its memorandum was submitted through the Palestine Government in accordance with the procedure laid down

The memorandum is in the nature of a report on the development of the Jewish National Home. In 1925, it is stated, there was a net Jewish im-migration (after allowing for 2151 departures) of 31,650-a figure 50 per cent higher than the aggregate net immigration in the three, pre-

The Jews now form 17 per cent of the population of Palestine—a larger proportion than in any other part of the world—and Palestine is attracting the main stream of Jewish iming the main stream of Jewish Im-migration from Europe, which formerly flowed to North and South America. About two-thirds of the 1925 immigrants came from Poland, Russia and the Ukraine.

### Increased Flow of Capital

Jewish capital brought into Pales tine during the year by public bodies and by private individuals is esti-mated at a total of £3,000,000; the corresponding figure for the whole period from October, 1917, just after the beginning of the British occupation. to March 31, 1926, is given as £9,786,000, of which nearly half was contributed by the Zionist organization and allied bodies.

The first half of 1925 was a period of marked prosperity, but in the autumn the situation took a less autumn the situation took a less favorable turn, and at the beginning of 1926 there were nearly 5000 Jewish unemployed. It is pointed out, however, that the unemployed have not been allowed to become a charge on public funds and that measures have been taken to absorb them. The nave been taken to absorb them. The temporary depression is attributed, in part, to the heavy winter rains, which threw out of work a good deal of labor employed in the building and constructional trades, and in part to the contraction of credit due to a rather sudden falling-off in the immigration of small capitalists. This, in turn, is largely accounted for by the disturbed situation in Poland and its disastrous effects on

Poland and its disastrous effects on the Jewish bourgeoisie, from which a large proportion of the middle-class immigrants have been drawn.

Material Progress Made
In spite of these difficulties, material progress has been made. The rapid development of industry is liustrated by the marked increase in the quantity of industrial power supplied by the Jaffa Electrical Corporation, which operates in the Jaffa area. plied by the Jaffa Electrical Corpora-tion, which operates in the Jaffa area the so-called Rutenberg concessions. In the neighborhood of Haifa, the other principal port, a group of Jew-ish public bodies has acquired an area of 16,000 acres for develop-ment as an industrial and commer-cial center in the form of a garden

In the same district a large textile factory is being built with capital mainly subscribed by Jews engaged in the textile industry in Poland. The number of Jews on the land at the end of 1925 is estimated at 24,-000, as compared with 15,000 at the census of October, 1922. In April, census of October, 1922. In April, 1926, the Woman's International Blonfat Organization opened an agricultural school for women in the Vale of Jesreel, the only institution of its kind in the country.

School Enlargements The Hebrew schools controlled by the Zionist Organization hacressed in number from 550, with 13,245 pupils, in September, 1924, to 633 with 16,122 pupils, in September,

pupils, in September, 1924, to 633, with 16,122 pupils, in September, 1925. Among the pupils at these or other Jewish schools are stated to be 77 Moslems, 27 Christians, and 24 Samaritans, while there are 442 Jewish children at Christian schools. The Technical Institute, maintained under Zionist auspices at Halfa, is giving complete courses of instruction in the various branches of the building trade, and is also providing evening classes in a number of other technical subjects. It is increasing to note that the pupils include a number of Arab workmen. The Hebrew University of Jerusalem has been enlarged by the addition of Instituties of Natural History and Mathematics and a school of Oriental studies, including an Arabic department. There are now 125,000 volumes in the university library, which has recently been enriched by a number of valuable gifts. from learned institutions and foreign governments in connection with the formal inauguration of the university a year ago.

SAPE DEPOSIT VAULTS rafiroad trains in their windows. coupled with suggestions that customers save for coming vacations; haberdashery displays attract the loiterer. Only as we approach the upper end of the street do we find a distinct financial atmosphere. The last block before the Board of Trade marks the height of the street's dignity. One brown stone Department Shows Trade marks the height of the street's dignity. One brown stone building is most severe in style and next it is a gray stone bank building, square and massive, with great lonic columns upholding the portico. There is, by the way, a nice distribution of columns in this block, for those of the two buildings opposite assign Doric columns to the hig local bank, while the Federal Reserve District Bank has Corinthian capitals for its columns. Just these four buildings to the block, each occupying the space from street to alley helfway down the block and all four with something of the dignity of portly bankers.

Board of Trade square and modern structures is the old Board of Trade, not a third their height, and in the most approved of Victorian architecture, with three little towers—the central one with a clock in it. This tower used to be taller, but was lowered for some reason several years ago. Two tall stone women stand over the entrance and their presence does nothing to enhance this "ornately unbeautiful building," as Robert Shackleton characterises it Yet this structure marks the aupremacy of Chicago as a grain market and is the center of the country's grain trade. It brings memories of Chicago's historic days, of panics and "corners," of "Old Hutch" in his baggy suit, slouched in his office chair, smilling and drawling soms quaint bit of humor, the while he held the fate of "the street" in his hand; of P. D. Armour and, later, of Joe Leiter, and others who took a hand in great grain deals.

Here we see again the difference between the Eastern and Western streets. Men high in the financial world reach Wall Street about 10 in the morning; a man coming to see Samuel Insull at 10, was told casually that Mr. Insull had been at his desk since shortly after 7. Once head of another great group of utilities, Colonel Syllesby was another man early at his desk, a man whose ideal was to maintain the old-fashioned virtues and who never allowed his vision as an engineer to be dominated by his work as a developer on the financial side.

Wall Street is a thoroughfare, settled and dignified, with history behind it. La Salle Street has much of its history in the making. It is a friendly street where the grain market of the Nation love it, look not on the street as it is, but rather as it is, but rather as it is to be in not so many years to come, when the roadway will be a boule-ward that will run straight through ward that will run straight through proved of Victorian architecture with three little towers-the central

Department Shows Progress

BOMBAY (Special Correspond ence) -The textile section of the Department of Industries, Madras Presidency, has of late years developed very rapidly. The activities of this section, in addition to the hand-loom weaving industry, cover cognate subjects, such as hosiery, lace and embroidery, dyeing and painting, and also sericulture and

silk flature reeling.

The policy underlying the activ!:ies of the section came up for considers. In add contrast to these towering, quare and modern structures is the dld Board of Trade, not a third was of the opinion that until some method of stimulating the demand for the products of the hand loom, or of cheapening the raw material re-quired by the weaver, or of altering his economic condition could be de-vised, the benefits of the methods now vised, the benefits of the methods now followed by the department for the uplift of the community, which aim mainly at increasing or accelerating production, were somewhat doubtful. The committee also held that the improvement of the hand-loom weaving industry must be undertaken on a comprehensive scale, and recommended that the work should be converted from an extensive to an intensive basis.

The Give Demanatrations

To Give Demonstrations At a conference of experts, both officials and non-officials, it was agreed that a system of demonstration weaving parties be introduced. These parties were to show, by the actual output of finished goods, working, as far as possible, under normal village conditions, the practical advantages of improved methods and new appliances. The conference further considered that the improvement of the economic conditions of the weaving community is as much, if not more, dependent on the influences of education and cooperation as on the introduction of improved appliances, and that, therefore, it was advisable to organize special achools and special cooperative societies for the benefit of weavers, under the Department of Industries. The Government accepted all these recommendations last year and brought them into effect.

Ten of these demonstration weaver. tion weaving parties be introduced.

reflect.

Ten of these demonstration weaving parties are now at work in the Madras Presidency. A textile institute has been started for the training of young men in improved methods of weaving and allied arts. The training given in the institute is of a thoroughly practical character. There is a manufacturing section which is engaged in the construction and supply of improved types of hand looms and appliances. In the research section experiments are carried out on various problems connected with the textile isduarry.

Course of Training Provided

also made to provide training in lace and embroidery in select centers.

A number of tracts were brought under mulberry cultivation last year and in some cases the rearing of silk worms was also undertaken. It is proposed by the industries destinated by the industries destinat

partment to introduce sericulture in extensive areas throughout the Presidency wherever it is found that the mulberry bush and the silkworm will thrive.

It is realized there is no possibility of South Indian silk finding its way into the world's market as a raw silk yarn and cloth, so long as the present primitive reeling and the present primitive reeling and throwing persist. Proposals have therefore, been submitted to the Gov-ernment for the purchase of two ernment for the purchase of two domestic flature reeling machines of the Italian type for demonstration and for the training of operatives in the cocoon producing areas, and for one steam two-basin flature for demonstration at the Textile Institute, so as to enable the instruction students, if the capitalists do not students, if the capitalists do not come forward, the Government will probably consider the question of itself pioneering the silk industry in south India.

# BOOK REVIEWS AND LITERARY NEWS

## Trevelyan's History of England

History of England, by George Macaulay Trevelyan. London: Longmans. 12s. 6d. net.

The original nucleus of this book, which deals in an extraordinarily comprehensive way with English history from the earliest times down to November. 1918, was the Lowell Lectures, delivered in Boston, Mass., during the spring of 1924. "I therefore." writes with the spring of 1924. "I therefore." writes with the spring of 1924. "I therefore." writes tissues which brought about war between two and her American Trevelyan provides many excellent colonies, are both masterpieces of calm common sense, yet written with all the imaginative energy and pictures queness of one who observes them through the eyes of the romanticist, not those of the classroom professor.

Of the American War of Independence, he writes: "It was a civil war, not a war between two nations, though when the battle smoke at spring of 1924. "I therefore," writes Mr. Trevelyan, "dedicate the book in its present form to President Lowe!! of Harvard and my other kind hosts

disappointed. Never were the historian and the raconteur, the purveyor of facts and the graceful man of Trevelyan regards this book as day."
I an essay and a treatise, an We follow from its earliest begin-Mr. Trevelyan regards this book as both an essay and a treatise, an essay "in so far as it attempts to analyse the social development of the nation in relation to economic conditions, political institutions and in England. While abroad it might

volume. For to us there is some-thing wonderful about it. Mr. Tre-velyan's single volume of "British History in the Nineteenth Century." containing so much, yet without sign of cramping or hurry in its method and presentation, was a remarkable piece of work. But here we have in 700 pages a narrative of England and of much beauty and repose in the lives and the landscape of England its people in all parts of the world. the first beginnings up to the end of the World War.
While it is true that a general

ounding in the main facts of British history is taken for granted, and the book is often unable to explore and even more than indicate imporant events in the evolution of its theme, yet so intimate is the writ-er's knowledge of the subjects with which he must often deal but briefly, so excellent is his judgment that a sentence is capable of conveying more to the student than a whole chapter of labored statistics, and Mr. Trevelyan finds space to give us characteristic sketches of important personages, to be witty and even oc-casionally irrelevant when the mood The main conclusion which

emerges from the perusal of his book is that the writing of history, while the result of enormous industry and profound reasoning, can also be good fun. We may conclude that Mr. Trevelyan has inherited the gift to make it so, both for himself and the reader, from his great-uncle, Macaulay, who wrote history like a sportsman. The prejudices and the inaccuracies of Macaulay, however, find no place in Mr. Tre-velyan's work. As in his "His-tory of the Nineteenth Century," so here, there is absence of political bias, which is perhaps the more noticeable as his interest is as much with men and their influence upon their country as with the actual re-cording of events. His consideration of the conflict between the Cavaliers

though when the battle smoke a length subsided two nations were standing there erect. . . . It was well that America was made. It was tragic on that occasion."

Those familiar with the author's method of writing history will come to this volume with pleasurable anticipation; and they will not be parting was perhaps inevitable at some date in some form, but the parting in anger and still more the memory of that moment's anger fondly cherished by America as the starting-point of her history, have letters, more admirably combined. had consequences that we rue to this

activities: a textbook in so collapse into sheer class warfare far as it preserves the narrative form in brief, deals in dates and gives prominence to leading events and free itself from the tyrannous toils of another, in England it was "a con-But when we have labeled it in our own or the author's words, we have conveyed nothing of the charm, even of the wonder of this compact prosperous." In England It was a contest for political and religious ideals that divides every rank in a land and economically prosperous." In England It is a contest, in England It was a contest, in trial revolution was a slow-moving stream until Victorian days, then it acquired "the momentum of water over a mill-dam." Reviewing it in the present day, Mr. Trevelyan re-marks cryptically, "It is a cataract still."

Regrets there must be for the loss so sane and tolerant a temper, the mistakes and follies appear sma compared to the immeasurable good fortune which has attended England in the evolution of self-government. Those things which put and keep back the clock of progress, military monarchies and continuous religious monarchies and continuous religious persecution, with all their inevitable despotisms, were foreign to the English character, and found no abiding place. The links between the King and his people were much more intimate and workable than in other European countries, and it was in an European countries, and it was in an atmosphere of good will for the most who part that the Constitution developed along lines benefiting the whole rather than a mere favored minority. In writing of these things, and of

Illustration by Francis D. Bedford

Among the Elizabethans

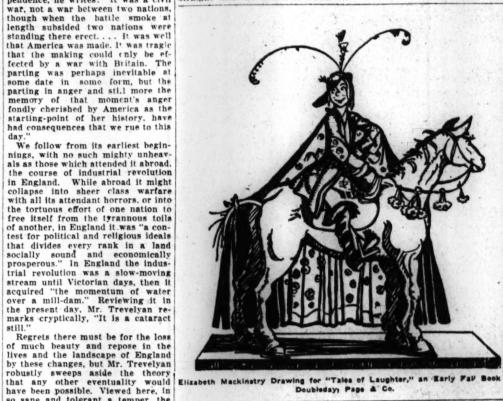

Elizabethan Life in Town and Country, by M. St. Clare Byrne, M. A. Boston and New York: Houghton Miffin Company. \$2.50.

It is abundantly clear that not only in the religious question, but in the religious question, but in the religious question, but in the religious question and all the big questions of the day, the Queen and her ministers had no such comprehensive view of the situation, but, like most governments in unsettled times struggled blindly on dealing. thoroughly rewritten to suit our times, struggled blindly on, dealing present-day point of view. It matters with each problem as it thrust itself little how brilliant a galaxy of his-torians has illumined each nook and But Miss Byrne's study is mainly

vestigate those niches afresh and from our own angle of approach. We are not interested in bolstering up a nation, a monarch, or a political party—favorite leit-motifs of previous historians—neither do we care merely to record the facts. We supply motives of our own—it may be popularize history, or to "personalize" it, to dramatize more width. popularize history, or to "per-alize" it, to dramatize more vividly supper as a defense against the ex-pected punishment. Then the sweep with his call:

other, and shove all the enigma of the Queen herself, whose seeming in the Jock to it while it roasted, the Queries; Poets of Vesterday; Comments of the Sprae argues that nothing of vital importance turns upon such an asplanation. Elizabetà, she observe, was all-important to the nation as the symbol of its unity and new ammer, with food. The farm indicants, but the key to Elizabeth and to all the great movements of the reign lies in the people as a whole. "It was not so much what Elizabeth was," she contends, "but what men conceived her to be, that mattered and the poople of the suits of our realisation of ourselves as an antion, and able to imagine; it future on the grand acale, it is in its form and able to imagine; its future on the grand acale, it is in its future on the grand acale, it is in its maintain that we find the reactions of the fact that Tudor children were and har court to explain the actions of the Guern and har court to explain the actions of the fact that Tudor children were and har court to explain the actions of the Guern and har court to explain the actions of the Guern and har court to explain the actions of the fact that Tudor children were and har court to explain the actions of the Subspace of the people Miss Byrne goes to the people of the subspace and clarity of the subject that stu
The series repeted the troated. The form of the subspace and the reaction of the subspace and the reaction of the subspace and the reaction of the fact that Tudor children were regarded rather as small adult, whose main task was to grow up and and har court to explain the actions of the Subspace and the reaction of the subspace and crowded little volume evidence and carries of the people of the subspace and crowded little volume evidence and carries of the people of the subspace and carries of the

humanity"; and of Rhodes, "this practical dreamer."
With a brief chapter on the World
War, Mr. Trevelyan concludes his
book. The present he has spoken book. The present he has spoken of as "a cataract"; of the future he refuses to prophesy, though those who read him carefully can find warning and advice, if they will. "Of the future," he writes, "the historian can see no more than others. He can only point like a showman to the things of the past, with their manifold and mysterious messages."

does not deserve many pages of ap-preciation, but there are inconsis-tencies that do not matter if one reads with a good-humored toler-

its leading characters, or to "place" a period in its relation to humanity as a whole, or it may-be to demonstrate the influence of economics on a nation's growth. But whether history so rewritten be an improvement or not, it is at least different, and it meets our tastes.

Miss Byrne has no major discoveries to offer in her revision of Tudor England, but she approaches this well-worn field from a somewhat new angle that makes her study a distinct contribution to the literature of the period. The difficulty with Elizabeth's reign has ever been its complexity, its abundance of great names and great movements—religious, political and economic—that bear little apparent relation to each other, and above all the enigms of the Queen herself, whose seemingly freesponsible actions are still incapable of a satisfactory explanation.

Then the sweep with his call: "Swepe chimney swepe, mistris, with a hop-derry, dery, swepe chimney swepe, mistris, with a hey derry swepe from the bottom to the top, swepe chimney swepe, mistris, with a hey derry swepe from the bottom to the top, swepe chimney swepe, mistris, with a hey derry swepe from the bottom to the top, swepe chimney swepe, mistris, with a hey derry swepe chimney swepe, mistris, with a hey derry swepe from the bottom to the top, swepe chimney swepe, mistris, with a hey derry swepe chimney swepe, mistris, with a hey derry swepe from the bottom to the top, swepe chimney swepe, mistris, with a hop-derry, dery, swepe." Then the great lord at hey dery swepe chimney swepe, mistris, with a hop-derry, dery, dery, dery, dery, dery, dery, swepe." Then the great lord at his dinner; "As the dishes, estill in this work to keep a temperature carried through the great hall, the whole household stood reverently. Finally, the meat was set before Anthony Viscount Montague, the gentlemen-in-waiting, were carried through the great hall, the whole household stood reverently. Finally, the meat was set before Anthony Viscount

The Big House?

The Big House wason. The Big House?

The Big House by Mildred Wason. Boston and New York: Houghton Milling Company, 13.

The Big House wason was the family at heart and it is on her Boston and New York: Houghton Milling Company, 13.

The Big House wason was a complexities of modern American life that must offer amaningly fruiting bolds for fiction writers, though not to many have taken advantage of the many have taken advantage of the many have taken advantage of the family, all of which View and a manural state due to what we have a grap of life as it must be lived in the conditions of today, that a landleder money and the way agang of the service of a certain New it call sufficient phase of these conditions are the willing of a tradition or back. Well, now that we can about he will be phase of these conditions and the stricting after acceptance with the land of the conditions of today, that it will an phase of these conditions and the stricting after acceptance with the land of the conditions of the conditions of the conditions of the conditions of the wason was a stricting after acceptance with the land was a grap of life as it must be lived in the conditions of today, that we have the ability to guide them expected to derogate all its powers, was the same of the farmaching of a strating after acceptance with the land of the conditions of the character, and the same way will be a stricting after acceptance was not of the farmaching of the laft of the fartition and family and have have provent the conditions of the character, and the conditions of the character, and the conditions of the character, and the conditions of the character of the condition

life that is of the first importance to us today—are we going to establish tradition or are we to settle back on our success and squander it in pleasures? The question is asked by "The Big House" and, in one case, antwered, but remains open just the same, to prod the thoughts of Amercans.

Communistic Doubts

days, when the Communistic state still existed more or less as a collection of words and arguments in the imagination of the comrades. In short, we miss the note of confident leadership and high purpose that are surely necessary to set a vast population moving forward in the tracks of sound and healthy progress.

Mr. Trotsky scarcely conceals the fact that the Soviet Republic is hanging in the balance. After two years of Lenin's famous "New Economic Policy," the scales show a hight tittoward Socialism and away from Capitalism. According to statistics the socialization of production ahows a gain of 3 per cent. But fix view of the strong capitalistic tendencies of the strong capitalistic tendencies of the strong capitalistic tendencies of the calculated objective subjectively imposed tasks of the operative workers' and Peasants' State."

Control Figures of the National Economy," which is heralded as though it were the break of a new era. One can understand that the table has its importance, that it will prove a help to co-ordination and a stimulus to progress. But it is only an accumulation of statistics, many of which seem likely to be inexact. And surely when the guiding motives of the state are becoming so confused, the Republic needs more vital forms of inspiration than figures.

Observation and tendencies with the subjectively imposed tasks of the microrial is the production of the Calculation tendencies with the subjectively imposed tasks of the subjectively imposed tasks of the subjectively imposed tasks of the microrial is the production of the Calculation tendencies with the subjectively imposed tasks of the microrial is the production of the Calculation tendencies with the subjectively imposed tasks of the microrial is the production of the Calculation o Yet Mr. Trotsky refers to the table as "the accompaniment to the mighty a gain of 3 per cent. But in view of the strong capitalistic tendencies of the policy, Mr. Trotsky evidently re-gards the future with some concern. In fact his best hope seems to be that American capitalism should be-gin to take the downward grade, or that "the proletarian revolution should develop in Europe during the next few years."

historical music of the progress of Socialism," and then goes on to say, "Socialism means accounting." But after Mr. Trotaky has mar-

"An old house of books"

given the undertaking. And finally a full-dress, land-and-sea attack march, 1864, did the armies of the Union operate in harmonious combination and attain the tell effect of their numerical superiority. They will remind us how, when Pitt stopped political interference with the war machinery in 1757, separating the supply department from the executive, the fortunes of Britain rose in two years from their lowest ebb to extraordinary heights of prosperity.

On the score of efficiency the arguments of the experts are no doubt unanswerable. If we carried our normal methods of business into the sphere of war, we should hand over to the experts all the power they asked, and probably win our wars. But in the meantime, what would become of democracy?

Such are the questions at issue in General Ellison's clear statement of the Gallipoli tragedy and all that it implies. The author writes as a solder, and necessarily gives the soldier's point of view, though he admits that democracy cannot be expected to derogate all its powers, and that some form of companying the supplies or ham the leading lights of the army and dier, and necessarily gives the soldier's point of view, though he admits that democracy cannot be expected to derogate all its powers, and that some form of companying the supplies of the expension of the maximum of praise or blame for the outcome of his enterprise.

Such are the questions at issue in the maximum of the democracy cannot be expected to derogate all its powers, and that a democracy cannot be expected to derogate all its powers, and that a maximum of praise or blame for the outcome of his enterprise. praise or blame for the outcome of his enterprise.

### Are You a Daphne?

Baphne Brand, by Ernest Raymond New York: George H. Doran Company

New York: George H. Doran Company.

IN HIS story, "The Rich Boy," P.
Scott Fitzgerald observed: "Begin with an individual, and before you know it, you find that you have created a type; begin with a type, and you will find that you have created—nothing." In his account of Daphne Bruno, Mr. Raymond begins at the time of her birth, in the latter part of Queen Victoria's reign, and in tracing her development he has told the story of many women, and perhaps men, of her generation. perhaps men, of her generation.
Daphne herself is an individual, but
her experiences are typical.
In justice to the vigor with which

he desired to relate the story of Daphne Bruno, the author has used the longer form of novel, but to suit the modern taste for the shorier form, he has ingeniously divided his work in two volumes, each of which is a complete story in itself. Each

however, is a necessary complement to the full savor of the other.

The story of Daphne Bruno begins with a deft indication of the mental attitude of the age toward life, by following the thoughts of T. Tenter Bruno, as he received the occasional comments of Hollins, a woman servant. of some ability, and had a reputa-tion for clarity and perception as a critic. He had his poses as a lit-erary figure, but he was aware of them, and was sometimes amused at the weakness which indulged them + + +

Little by little the direct and subtle influences which guided Daphne's development are traced, the absorption of the father in his work, the self-interest and gossip of servants, the governess and her sentimental novels, the girls' school. Although he should not have been T. Tenter should not have been. T. Tenter Bruno was amazed to find her nat-ural intelligence so fogged and the furniture of her mentality so ordi-

nuralture of her mentality so ordi-nary and undistinguished.

Daphne encountered love, and the author adjoitly shows that in the form in which it came to her, Daphne was not able to distinguish rightly between the dross and the gold. The

A SCOMPANION on a country walk, give me a dog. Of course, this is a matter of taste and some people may prefer to walk alone or with a party of organized "hikers." There is pleasure in all of these, but others have sume their praises: no one whom I remember, except Thoreau, has celebrated the dog as a traveling companion, and he has said very little.

In the first place, a dog is always to more of the dog as a ways to make the most of the first place, a dog is always to more the country bonne from the widest wanderings, but that in the city was lost the mother and anasceptible artist of such promise as Miss at Miss and the city was lost the mother and needle to see the house. I used to think that in the city was lost the mother and needle to econize his home the wandered two blocks from the house. I used to think that in the city was lost the mother and needle to econize his home the wandered two blocks from the house. I used to think that in the city was lost the mother and needle to econize his home the would sit or taking up eithing, however, she not only had proved herself poor to see in failed him and he would sit or sampled to recognize any house that looked like ours. The dog is still nearer the ground than most of us are, both litterally and figuratively, and, while that is certainly his limitation, it is also one explanation of his strength.

As he runs along there comes to

panion, and he has said very little. As he runs along there comes to his sensitive nose thousands of sense, the weather, the condition of the ground; he does not mind getting wet or dusty or muddy; he never has any more important engagements; and, above all, he is always easer for adventure. All you have to say the sense of the is, "Want to go for a walk?" and he is ready to leap out of the profoundest sleep, to stop in the middle of his dinner, to break off the wildest game, and go. And he does not have to delay to dress. His dress is made for all weathers, all roads, and every her to smell of it and then its myster.

### An Etcher's Idyl of the Sea

Description of the control of the co

"The Lord God omnipotent reigneth"

Written for The Christian Science Monitor

STRANGE as it may seem after gain such a standpoint we need to centuries of Christianity, there consider soberly and seriously Jesus' are still many people in the world who believe in fate, and enter-God and the acts of power and wontain the unhappy thought that their der by which he himself proved the happiness and wealth are at the truth of his statements. Modern mercy of a mythical power. Giving thought says we can do without his wery little heed to the comprehensive and rational teaching of wise and holy men of old, contained in such statements as, "The Lord God omniptions of his statements. Modern truth of his statements. otent reigneth," and, "Do not I fill thought of those seeking a cure for they live in constant lear of evil, and

In hospital and clinic, nearly all is look into a future clouded by uncertainty, really unaware of their folly in setting up a false god and of the contribution they themselves are making toward their own undoing.

Sometimes fate is misnamed Proving and effect; fears are many; God is and effect; fears are many; God is generally presumed to be absent.

Sometimes fate is misnamed Frovidence,—with fate's cruel nature still unchanged. Then it is sorrowfully and gravely preached that men should meekly endure pain and loss, want and woe, since these come from the hand of God! What has the world done with the brightest light that ever shoes upon the human pathway, the life and work of Christ Jesus? Surely that was not his doctrine. Has not his real message long. Not once did he hint at pittless mate. pathway, the life and work of Christ Jesus? Surely that was not his doctrine. Har not his real message long escaped mankind? Has not a perplexity and confusion of thought arisen in Christendom which has long hidden the real purport of his teaching? There is no word of fate in the New Testament, nor any indication that God, as "Father of our Lord Jesus Christ," and "Our Father," ever sent pain or woe or want or sickness to His children. All the words and works of Jesus indicate quite a different understanding of the great All-power. "Ye do err, he said to his disciples, "not knowing the scriptures;" and may it not be that, as Mrs. Eddy inrists, many in our day still err for the same reason. How cân we hope to gain a better standpoint, a better mental state! How may we be rid of fear and in harmony with the thought of Jesus and that truth-loving Faalmist who held so firmly to the one great First Cause? Mrs. Eddy tells us how. "To break this earthly spell," as he says, "mortals must get the true idea and divine Principle of all that really exists and governs the universe harmoniously" (Science and Health with Key to the Scriptures, p. 33). To

"Tin-No-Hand"

this subject, as their boat lay rocking upon the lake water, strengthening their trust in God, freeing their thought from belief in the power of evil, explaining what far-reaching consequences his teaching was bound to produce in the world.

Christ Jesus still talks to the pages of the Gospels; and pon-dering his words in the light cast upon them by Christian Science, we too may rise above our earthly wees, and, miraculous as it may appear, find healing for our sicknesses.

## MIXED PRICE MOVEMENTS IN STOCK MARKET

### Bear Selling Opposed by Pool Support-Motors Give Ground

NEW YORK, July 21 (49)—Mixed price movements, reflecting a further readjustment of speculative accounts, characterized the opening of today's stock market. In the foreign exchange market, the "flight from the franc' was checked, at lenst temporarily, by the appearance of strong buying support abroad which caused the demand rate here to jump 20 points to 2.16% cents at the opening.

Most of the opening stock quotations disclosed small fractional changes, a drop of 2½ points in General Railway Signal being one of the few early features.

Bear traders acting on the theory that the recent decline had not sufficiently corrected the supposedly topheavy speculative position, pressed stocks for sale during the early trading, centering their initial attacks on the motors, which quickly yielded 1 to 2½ points.

The weekly report of the American Petroleum Institute, showing an increase of 20,000 barrels in the daily average of gross crude oil production in the week ended July 17, furnished an excuse for a renewed attack on the oil shares. Rails were slow in responding to the excellent June earnings reports now being published, and to the approval of the revised Nickel Plate merger plan by the directors of the Pere Marquette and Hocking Valley Railroads. Foreign exchanges displayed a strong undertone at the opening, all the continental paper currencies railying in sympathy with the French franc.

Industrials Irregular

Irregularity continued through the noor dealings, but motors and some

Irane. Irane.

Industrials Irregular

Irregularity continued through the noon dealings, but motors and some of the other standard industrials recovered all or part of their early losses. Meanwhile, buillish operations were resumed in a number of specialties. Air Reduction and Texas Gulf Sulphur each climbing at least 3 points to new high records for the year.

A break of 6½ points in Buffalo & Susquehanna preferred to a new 1926 low at 43½ was one of the few important developments in the morning trading in rails.

All sections of the bond market gave ground today before a steady influx of selling orders inspired by unsettling foreign financial developments and the continued stock market reaction.

Bonds Depressed

Bonds Depressed

Bonds Depressed

Uneasiness over the French situation, with the possibility of a short life for the new cabinet, depressed most of the French Government and railroad issues another point or so. Other foreign obligations were quiet.
Railroad liens drifted lower with trading turning dull on all reactions. Norfolk & Western divisional 4s fell back nearly a point. Local tractions

lower with

Norfolk & Western divisional 4s fell back nearly a point. Local tractions issues declined along with other purlic utilities, such as Utah Power 5s and Brooklyn Union Gas 5½s.

Weakness of the oil shares was communicated to the content below the sagged 2 points to 129, Almost 20 points below the year's top price attained several weeks ago. Other petroleum issues also were heavy on reports of impending price cuts of various products.

An \$18,500,000 issue of West Penn Power 5% bonds was oversubscribed.

### NATIONAL PRESS CLUB FINANCING

WASHINGTON, July 21 (P)—Issue of \$1,500,000 7 per cent cumulative preferred stock of the National Press Euilding Corporation, the holding corporation for the National Press Club was announced today by John Hays Hammond, president of the corporation.

Hays Hammond, president of the corporation.

The National Press Building is designed to be a national monument to the press, and is being erected here on the site of the historic Ebbitt Hotel, in the heart of Washington's business district. The structure will house the Washington correspondents and be the permanent home of the National Press Club, which conprises about 1000 writers and their associates.

The issue of preferred stock is being sold to provide for an increase in the original building plans, already completely financed. Through a special act of Congress the club was permitted to erect a structure three stories above the height allowed under the zoning laws of the District of

zoning laws of the District of

### MOTO-METER COMANY EARNINGS LARGE

NEW YORK, July 21—The forthcoming report of the Moto-Meter Co, for the first six months is expected to show met earnings of between \$4,125,000 and \$1,150,000 after all charges, and available for dividends on the 200,000 shares of Class A stock. This would be equal to between \$5,50 and \$5,75 a share on the "A" stock which reserves preferential dividends of \$2,60 annually. The "A" stock also participates in one-third of any additional dividends paid after \$1 a share annually is paid on 200,000 shares of "B" stock.

Egrnings in the fiscal six months this year will compare with net for the full 1925 fiscal year of \$1,794,592, equal to \$8,97 a shares on "A" stock.

MISSOURI CORN CROP

JEFFERSON CITY, Mo., July 21—The
Missouri corn crop is 80 per cent normai, indicating 28.24 bushels an acre
upon the 6.252,000 acres planted, or 192,738,000 bushels, according to E. A. Logan
of the United States Bureau of Agricultural Economics and Jewell Mayes of
the Missouri State Board of Agricultura.
The yield in 1926 was 20,338,000 bushels
upon the same acreage as planted this
year, from a July condition of 85 per
cent; yield in 1924 was 170,612,000; the
five-year average is 183,041,000.

PORTUGAL PAPER CURRENCY UP
LISBON, July 21 (P)—At a general
meeting of the shareholders of the Bank
of Portugal, approval was given the new
agreement made between the bank and
the Government for an increase is the
paper currency by new issues amounting
to 325,000 contos, or the equivalent of
£3,250,000. Of this amount £1,000,000 will
be used for banking transactions, £1,250,000 for facing the crisis in the colonies
and the other £1,000,000 for discounts in
the money market.

NEW YORK COTTON

COTTON SPINNING OPERATIONS
WASHINGTON, July 21.—The Department of Commerce, announces, according to preliminary figures, that 27,694,630 cotton spinning spindles were in place in the Trited States June 30, of which 1,770,990 were operated at some time during the month, compared with 52,267,400 for May and 32,287,584 for June, 1925. The aggregate number of active spindle hours reported for the month was 7,806,128,280 during June, and the normal time of operation was 25 days, compared with 35,2 days for May.

TEXAS GULF BULFRUR
Texas Gulf Sulphur Company, Inc., for the quarter ended June 30, 1924, reports not of \$1,855,818 after depreciation and federal taxes, but before depletion, equivalent to \$2,92 a shore par \$100 on \$5,850,000 stock, compared with \$1,850,624 or \$3,04 a share in the preceding-quarter and \$1,282,384 or \$2,01 a shore in the second quarter of 1985, Met for the first ex months of 1925 totaled, \$3,290,542, equal to \$5,58 a shore, compared with \$1,885,377 or \$4,24 a share in the first half of the previous year.

Howe soir No mixing company for the quarter ended June 30, 1225, reports ast income of \$845,715 after taxes, deprediation, etc., but before depreciation, equal to \$1.70 a share on \$95,038 nopar shares, compared with \$684,531, or \$1,40 a share, in the preceding quarter. Not income for the first six months totaled \$8,540,246, or \$3,10 a share.

### SUCCESS OF DE LAVAUD METHOD

New Cast Iron Pipe Patent Cuts Costs and Improves the Product

While, the consistent progress by United States Cast Iron Pipe & Lavaud cast iron pipe, and the manner. Foundry Co. the last three years has been due largely to the unusual demand for pipe and consequent large earnings, an important factor has been development of the de Lavaud method of producing tubular material. The company has successfully manufactured and placed on the market de lavaud cast iron pipe, and the manner in which it has been received has led to belief the market will expand steadily.

The pipe produced by de Lavaud machines is lighter than that of wandcast pipe, and approximately twice as strong. The material is so constructed that the surface is smooth on both inside and outside. The lighter weight creates a substantial saving in pig iron and reduces cost of shipping.

The smooth surface tends to effect more efficiency by less friction loss and greater carrying capacity. Another important factor is that there is less plant space required in producing de Lavaud pipe. Many operations necessarry with the sand-cast method are eliminated.

Manufacture Started in 1922 Foundry Co. the last three years has

Manufacture of de Layaud pipe was begun on a commercial basis at the company's Birmingham plant about the middle of 1822. Previously the Birmingham plant was used only for surplus production; it was one of the company's least productive units, With operations on de Layaud pipe centered there, however, profits of the plant have expanded rapidly.

The de Layaud machine at first turned out about 15 lengths of sizinch pipe an hour, but the process was improved so that during 1925 better than 40 lengths an hour were made by each machine.

The company is new operating nine de Layaud machines at Birmingham and four at Burlington, N. J. The latter started recently, but provision has been made at Burlington for the installation of 16 machines.

Originally the cost of manufacturing de Layaud pipe and in excess of that of producing and growing skill of operators have reduced cast to a point materially below the sand-cast process. Manufacture Started In 1922

FRENCH FRANC HAS A GOOD RECOVERY

PARIS, July 71 (P)—The French franc reacted favorably today, closing officially at 46.95 to the dollar, as against 49.22 yesterday. The reason given in financial circles is that the bear movement has gone far beyond the point justified by actual circumstances, and that a recovery from the violent fluctuations is certain.

WORLD COPPER OUTPUT LOWER

T. Harry Story of W. H. Stery & Co. has been appointed chairman of an arrangement committee to prepare for the opening of trading in grain futures on the New York Produce Exchange either on Aug. 2 or Aug. 5, the exact date awaiting issuance of a license from the Secretary of Agriculture.

TIDEWATER ASSOCIATED OIL

NEW YORK CITY PIPE BIDS

NEW YORK, July 21—The department of water supply, gas, and electricity of New York City will open bids
on July 27 on 5000 to 6000 tour of cast
iron pipe, ranging from 6 to 12 inches
in size.

Alliance Realty Company for the alx months ended June 30 reports net income of \$266.53 after expenses and isses, compared with \$160,725 in the first half of 1923.

# WOOL BUYING IS FAIR, WITH

ers, however, have been rather keen for wool. Capes are rather above opening rates.

The East India wool auctions opened in Liverpool yesterday for a three-daya' series with offerings of only 12,500 bales. On the opening day, as usual, the wools offered were of the poorer types, mostly carpet sorts, but these were all 5 per cent dearer. There were no good Jorias or Vicaneres offered, although the offering today probably will show a fair proportion of these wools which are expected to rule somewhat firmer.

There is evidence that the carpet manufacturers are getting in position to do a bigger business once more. They have, in fact, evinced a disposition to buy wool on the basis of 40c, clean, here, for both combing and filling descriptions, although stocks of wool available in the American markets are rather limited, while the offerings which are being made currently from abroad are usually a few cents above this level.

There has been more activity in the wools left at the River Plate during he last week, more especially for continental account. Some few small its of standard wools have been bught for importation to this county, including some Montevideo skirted of rewound 3s at 30 and some 4s at centa, both on a cost and freight as, in bond. River Plate More Active

nts, cost and freight in bond, for sols of average shrinkage. A com-ned lot of 100 bales each of Monte-deo 50-56s has been sold at 27 cents r woet estimated to shrink 24 per at: 48s at 31 cents for wool esti-ated to shrink about 30 per cent; d 46s at 29 cents for wool estimated shrink about 27 per cent. There we been other lots offered at or out these same prices, which is, a tie too high usually to bring much sincess.

miness.

New Mexico Sales

Interest in the new clip purchases its week has been centered on the lea which were being held in New exico, more especially at Roawell, here about 3,000,000 pounds of avy-shrinking old wools, were held storage and were offered at auction.

## NEW YORK BOND MARKET

IS FAIR, WITH

PRICES FIRM

Manufacturers in Market

for Most Descriptions—
German Demand Good

The tendency of weel prices, so far his any tendency is discernife at the moment, is against the buyer, although the struggle to maintain the market host the part of the wood merchants is being waged with some difficulty Nevertheless, the market holds very steady on all descriptions, and the outlook is promising for better business in the not distant future.

Manufacturers are still buying moderately. Even the largest factors are now in the market, and are showing an interest in practically all descriptions of wool. There has been motable linterest in quarter-blood combine wools, and more especially in the fine wools

## CHICAGO STEEL BUSINESS GOOD

Automobile and Railroad Buying Heavy-Consum-

Buying Heavy—Consumers' Stocks Still Light

CHICAGO, July 21 (Special)—Now that third quarter business in iron and steel on a satisfactory basis seems assured, producers are looking into the fourth quarter and scanning ther prospects for 1927.

Chicago have no car builders will suspend in August. When orders are solving into linguist in the fourth quarter and produced here. Freilminary information is to the arries are solving into the fourth quarter. However, both car buying and rail rolling will taper off before they improve. Some car builders will suspend in August. When orders are solving the fourth quarter, and the solver of the carriers continue to over-specify their rail fastening contracts, and are pressing for deliveries. Secondary rail buying is fair, but most 1925 contracts have now been worked off. The carriers continue to ever-specify their rail fastening contracts, and are pressing for deliveries. the 1925 crop did well. The Sea Island cotton crop in the West Indies was an average one. Efforts to révive the growing of this variety in Fiji are being continued, and it is estimated that some 2000 acres will be planted this assaon.

CUSTOMS RULINGS

1830, tariff law of 1922, as embroidered articles

The customs court, in a ruling just habded down, partly sustains protests of the Emil Frei Art Glass Company of St. Louis, filed against the collector's alseesment of duty on certain importations consisting of paintines on tile and mossile pieces representing biblical scenes and personages, intended for the decoration of the interiors of religious edifices. On entry, duty was levied on the articles in question as manufactures of colored glass, at 55 per cent advalorem under paragraph 124, 7822 act. Among other things, the protestants claimed free entry under paragraph 174, as works of art or under paragraph 174, as original paintings. Judge Waite rules that as to the mineral paintings on glass, which had been proven to be original productions of a professional artist, free entry should have been accorded under paragraph 1397. As to the remaining inferchandles, designated as mossile paintings, however, the protest is overruled.

### MISS RYAN WINS IN FIRST ROUND

Forced to One Deuce Set by R. Miss Shedden at Longwood

CHESTNUT HILL, Mass., July 21 (Special)-With matches in the Longwood Bowl singles and the men's wood Bowl singles and the men's doubles, the women's invitation singles, Massachusetts State junior and boy's singles and doubles all scheduled to take place on the courts of the Longwood Cricket Club today. Tollowers of this great outdoor sport were treated to one of the best court programs that has ever been offered Greater Boston tennis enthusiasis. The morning was devoted to the women's, junior and boys' events, with the Longwood Bowl singles and the men's doubles taking place in the afternoon.

the Longwood Bowl singles and the men's doubles taking place in the afternoom.

The women's singles started this morning and the favorites came through to the second round. Miss Elizabeth M. Ryan, Santa Monica. Calif., met Mrs. W. M. Sheddon of the Longwood Cricket Club and the first set was a battle royal, Miss Ryan winning after deuce had been called. The second set found Miss Ryan an easy victor, Mrs. Sheddon winning only one game. Mrs. J. D. Corbiere of the Longwood club furnished a mild surprise by the ease in which she defeated Miss Elizabeth/Bright of Cambridge, the loser winning only one game in the second set.

Mrs. A. H. Chapin Jr., Springfield, who has been winning a number of tournaments during the summer, defeated Mrs. W. B. Endicott, Boston. 6-4, 6-2. Mrs. J. L. Bremer, Boston and Mrs. N. W. Niles, Brookline had a hard-fought match which required three sets to give Mrs. Bremer the victory. The score was 6-1, 4-6, 6-0.

Miss Martha Bayard of Short Hills, N. J., who won the Rhode Island State singles and doubles titles last week, met Miss Penelope Anderson of Richmond, Va., and won 6-2, 6-4. Miss Edith Sigourney of Longwood easily disposed of Miss. I. L. Munford, also of Longwood, with the loss of only two games in the second set.

Cohen Wins Easlly

G. H. Prescott of Boston and W. K.

Cohen Wins Easily G. H. Prescott of Boston and W. K. Porter, also of Boston, had a close match in the third round of the boys' singles. Prescott finally winning in straight sets. 6—4, 7—5. W. F. Ochen Jr., Kansas City, one of the favorites for the title, disposed of R. F. Greene of Boston without the loss of a game, while P. E. Powers of Worcester won from N. W. Niles Jr., Longwood, 6—1, 6—1.

The most interesting matches in the The most interesting matches in the junior singles brought B. R. Bell of Austin, Tex., against F. X. Shields of New York and D. S. Strachan, Philadelphia, against H. H. Bancroft, San Diego. Shields is United States boys' champion and he gave Bell a battle before the latter won, 6—4, 6—3.

Strachan and Bancroft had a very hard-fought, three-set match. The

Strachan and Bancroff had a very hard-fought, three-set match. The first set went to Bancroft after 18 games had been played. The second set was well-fought with Strachan winning, 6—4, but the third set found the Philadelphia boy having the better staying powers and he won it with the loss of only one game.

Two Bowl Upsets

Yesterday furnished two upsets in
the Longwood singles when Alfred II.
Chinin Jr., Springfield, and Lucian E.
Williams, Chicago, two of the six
United States players who had been
seeded were eliminated, one by a nonseeded player and the other by a seeded
player. This made three of the seeded
players who did not survive the third
round of play, Cranston W. Holman,
Leland Stanford University, being the
first to go, when he lost his secondround on match Monday to Henry R.
Guild of Boston.

round match Monday to Henry R. Guild of Boston.

The end of the third round found three non-seeded players left in the competition and two of them were from California and the third from Texas. They, with W. T. Tilden 2d. hadloral champion, and Edward G. Chandler, University of California, are United States players who are left to keep the Bowl from going to a member of the Japanese Davis team as all three of the Japanese stars qualified for the fourth round yesterday. They are Takelichi Harada, Sekio Tawara and Teizo Toba.

Lewis N. White, former University of Texas star and intercollegiate doubles champion in 1923 and 1924, furnished one of yesterday's upsets when he eliminated Chapin in the third round 11—9, 6—3, 6—2. White won because he played steadier tennis than did the Williams College New England intercollegiate champion of 1923. He out-maneuvered his opponent in the last two sets with surprising ease and the first set was the only one in which Chapin made it a close battle.

Polo Game
prising case and the first set was the only one in which Chapin made it a close battle.

Toba Shows Up Well
Teizo Toba of Japan showed that he must be regarded as a coming tenniplayer when he eliminated Williams. Intercollegiate singles champion is 1923 and former Yale varsity capating and star, 3—6, 6—0, 6—3, 6—3, Toba must be regarded as a coming tenniplayer when he eliminated Williams. Intercollegiate singles champion is 1923 and former yale varsity capating and star, 3—6, 6—0, 6—3, 6—3, Toba must be receited with playing some of the previous encounters resulted in the scores while the third wood that the doors not propose to surrender his United States championship time. Captures Eastern Open Golf Championship One Stroke Short of Record

DELAWARE WATER GAP, Pa July 21 (P)-Walter C. Hagen, United States professional champion and former national open titleholder, toeastern open championship.

Welf Hollow Country Club course, Hagen played some of the most brilliant golf of his career. After settling new world's record of 132 strokes

Hagen played some of the most brilliant golf of his career. After settling a new world's record of 132 strokes for the first 36 holes in his first two rounds. he failed by only one arroke of equalling the world's mark of 21-for 72 holes made by Emmett F.cenen at Youngstown, Ohio, in 1922. A missen 22-foot put twas responsible for his failure. Rain, too, probably had something to do with it, for his worst round a 74 was played on a wet course. His other rounds were 67, 65, and 4 average 69. The former course record was 70, while 72 is par.

The climax of two days of dramatic play by Hagen came on the eighteenth green of the final round, when he took his stance for a 12-foot put that would have meant the tying of the world's mark for 72 holes of media play had it dropped. With the golfing courage that has gained him the reputation of the "best money-playing golfer in the world." Hagen sent his bail straight for the cup. It appeared eretain that the ball would drop, but it paused on the lip of the cup and remained there, while 'expressions of regret went up from the big gallery. This gave him a 69 when he needed a 68.

"I wanted that putt," said Hagen, after walking off the green, "but it wouldn't go down. That's the way of the game. Naturally a professional golfer plays for and likes to win money, but I forgot all about financial winning when I was going after that putt. I wanted to the that record." Hagen's card of 275 was 8 strokes ahead of his nearest competitors, John Farrell of New York. The young New Yorker, however, gave the professional attained which with 69, 72 and 75 for the last 18 holes. A birdie 3 on the fifteenth gave Hagen a one-stroke lead. From there of the four special prises of 3106 for each low round and 3506 first money. He also was awarded ag gold Wolf's head with diamonds for eyes.

ORLANDO PIANI WINS
IN STRAIGHT HEATS

NEW YORK, July 21—Orlando Piani of Italy defeated George Dempsey, sprint champlon of Australia, in two straight heats of a mile match at the New York Velodrome last night. Piani had one of his good nights with the New York Velodrome last night in of victory was not any too great in either heat, it was impressive.

Piani rode the first heat from the rear. He made his bid to get around Dempsey on the last turn and just got by him. They rode almost side by asid, with but the Italian came with a great up to the home stretch, but Piani won the rear in the second heat, and this lime it looked as if Dempsey would win, but the Italian came with a great rush in the homestretch and won by about a foot. Plani again rode from the rear in the second heat, and this lime it looked as if Dempsey would win, but the Italian came with a great rush in the homestretch and won by inches.

Rene Boogman, of Holland, won the 20-mile motor-paced race in spite of a puncture early in the race, which last and amid the plaudits of the crowd won the event, defeating Clarence Carman of Jamaica; Lawrence Carman of Jamaica; Lawrence Carman of Jamaica; Lawrence and Roy Johnson of Australia. The time was 30m. 22 1-5s.

VICTORIA TAX EXPERIMENT

Alter Laws by Decree When the French Protectorate Administration wishes any alteration to be made in these laws, all it has to do is to issue a Dahir "decree" in the name of the Sultan, in the sulling in Paris, but how many Dahirs have been issued (including one creating a monopoly for phosphates) and the New York Velodrome last night in the spanish to any. Their name is inglow.

Although it has so connection with the Act of Algeciras—it having been arranged by former treaties—the question of the general administration wishes any alteration to be made in these lumins and the same of the Sultan, in the Bulletin Official The Ministration wishes any alteration to be an amed the

CAPE COD WINDMILL SOUGHT BY MR. FORD

Structure at Yarmouth Erected in Eighteenth Century

YARMOUTH, Mass., July 21 (AP)-It's a broad step from automobiles to windmills, but Henry Ford has spanned the gap. He has made a bid for a windmill

which was catching the Cape Cod breezes when the embattled farmers of Concord were making history. There are other would-be purchaser his collection of New England an-Known as the Farris mill, the pic-

turesque atructure was built on the north side of the Cape in the eight-centh century. When it was moved in 1782 to Indian Town, later known as Friends' Village, in South Yar-mouth, it was hauled by 40 yoke of oxen. Men came from miles around to help, and the occasion was made The establishment was operated as

a grist mill and the farmers brought their grain to be ground into meal. The wings had ladder-like slats, with canvas which could be drawn over them when the breeze was light and rolled back in a heavy wind. Most of the other old mills on the

Cape have vanished although many of the milistones have been preserved.

END OF RIFFIAN STRIFE IS SEEN

Tribes Now Believed Ready to Settle to Peaceful Pursuits

TANGIER (Special Correspondnce)-Now that the Riman tribes are without their leader, Abd-el-Krim, who has managed for so many years to hold them together to work for a common cause, the general opinion is that they will settle down and accept the inevitable. But, the process is bound to be a very gradual one as experience has already shown when dealing with the warlike tribes of the Atlas. There may be sporadic risings here and there, but nothing in the shape of a general movement will ever be seen again. As a well-known Kaid in Southern Morocco has expressed it, however distasteful foreign domination may be to a people who have always been a law unto themselves, it is infinitely better to accept it than to have a return. ter to accept it than to have a return to the chaos which formerly existed; there is more money in it. This the Riffs will one day realize.

Boundary Line Adjustment

Rims will one day realize.

Boundary Line Adjustment

Whatever arrangement was arrived at in Madrid between the French and Spanish it would seem certain that there will be rectification of the boundary line in the neighborhood of the Ouergha because it divided up certain tribes so that they were partly under the French rule, and partly under the French rule, and partly under the Spanish. This led to friction and discontent, and rendered it difficult for the French to protect their loyal adherents and to make their town of Ouerzan and the western frontier safe in the event of a sudden rising. Spain will be shorn of some of her sone, but what the quid pro quo will be, if any, remains to be seen.

Possibly in consequence of the world's attention having been focused on the Moroccan treaties when the question of granting autonomy to the Riffs arose, there is much talk now of a general overhauling of the Act of Algeciras.

Apart from any question relating to Tangler, the provisions of this treaty seem to be invoked in some instances, presumably when not unfavorable and quietly shelved in others. They naturally touch upon matters of vital interest to the subjects of the various powers, and laws were drawn up by international bodies after full consideration of the circumstances of each case.

## The Library

Detention House Library . Constructive Force

Vienna, Austria Special Correspondence LTHOUGH it is only two years A old, and although it has never had any funds of its own, and has had no support except that given it by private individuals and organ-izations, the library in the Juvenile Court Detention House is already re sponsible for results that would re sponsible for results that would re-flect credit on the best financed and best equipped organization. Perhaps the most challenging of these results is the induction of a number of young people, originally sent to the detention house for correction, into juvenile-court work, or into some other related branch of social service. Too much emphasis cannot be placed on the significance and value of this achievement. There is always hope for unadjusted boys and girls as long as men and women with happily organized lives feel for these unfortunates a profound and intelligent sympathy. But when, out of the ranks of the unadjusted themselves there here to arise devoted.

the ranks of the unadjusted themselves, there begin to arise devoted and competent leaders, hope rises to the level of justifiable assurance.

The credit in this instance belongs originally to a library which, as has been suggested, is of limited proportions and unprejorations charproportions and unpretentious char-acter. In two acter. In two years, however, en-tirely through voluntary contributhis library has grown to include 1600 volumes, with a maximum possible patronage of 100 boys and

Weekly Discussions

For the most part, of course, ading is an individual enterprise; but there are stated gatherings in which it becomes a collective enterprise. The superintendent studie prise. The superintendent studies each child and decides what books to offer him. Once a week an attendant takes a tray of these carefully selected books to each child, from which the child chooses three. The incentive to read thoughtfully is motivated partly by weekly discussions. Both the individual and collective reading are made the basis of these discussions, which fre-quently turn on the question of how the people concerned may lead better, more useful, and happier lives. This makes the library something more than a source of reading as an

more than a source of reading as an end in itself. It becomes, rather, the source of a dynamic, impulsive, clarifying and synthetic force.

Anyone who has had experience with the old-time "Sunday school library" in the United States, commonly composed for the most part of any books which various parishof any books which various parishioners do not want, may weil be
dubious of the value of a library
made up of books supplied by voluntary contribution. That the detention house library is pedagogically
unse and as a result of this condition must be conceded. The apace
occupied by volumes of Schiller,
Goethe, and von Kleist is out of all
proportion to the probable choice of
an average, normal interest, But this
is the worst thing that can be said
of the detention house library, and
there is only one other adverse criticism to be made. There is not a cism to be made. There is not a single book with colored pictures in the collection. But the fact remains that the

But the fact remains that the library is a success; and it is a suc-cess notwithstanding the fact that the detention house director, Seyss Inquart, faces a number of difficult and diverse problems. The first of these is the nature, and the varied nature, of the wards committed to

Radically Different Groups

To begin with, Professor Inquart
is responsible for two major groups,
each of which present radically different problems. The one group is
composed of boys and girls, sually
from 8 to 18 years of age, who have
been committed for their, own offenses. The other group is composed
of boys and girls, all of them very
young, who have been committed for
the offenses of others. This latter
group includes children who have
been taken from adults adjudged unfit to rear children, and are being
kept in the detention house until
approved families can be found to
adopt them.

who, by their age and by the nature of their offenses, have been brought naturally within the jurisdiction of the juvenile court. The considerably maller group includes somewhat older young men and women, whose offenses may be of a somewhat more serious character, but who are first

offenders.

For the most part the present in-tellectual level of the young people in the detention house is not high. In this connection, it should be re-called that under the empired the education of the masses was not an enterprise which absorbed the state;

called that under the empire the education of the masses was not an enterprise which absorbed the state; and that many of these young people, and all of their parents, have passed through war, defeat, revolution, inflation, and deflation. Their whele history is that of a period in which the efforts of even wealthy people to engage in educational pursuits have been largely thwarted. The progress that is being made today is due entirely to the fact that, next to Moscow, Vienna is exhibiting a more highly organized interest in its children than any other city in the world.

Special Interests

There is no doubt but that the eager interest of these boys and girls in the library is due to, the fact that from books they are learning about definite things that they can do which will enable them to take their right places in the world. From this point of view, the most valuable books in the library are those of the "Urania" series. The Urania serves Vienna in somewhat the same way that the Brooklyn Institute serves Brooklyn, N. Y., but its classes are perhaps more systematic and rerious. Its publications are numerous and of considerable significance. The Urania Series is a series of handbooks, covering vocational interests and subjects that one might aspect to find in the curriculum of an extension aniversity.

As elsewhere, stories of advantures are nonpressed to the boys and strils than the other story of will and trust.

## **EDITORIALS**

Public opinion hears but very little these days about the International Labor Office at Geneva,

International Labor Organization

more generally known as the I. L. O. Yet this organization in its unobtrusive way is probably doing more for the raising of the standard of living of the workers all over the world than any other institution. Perhaps

more will be heard about it in future, because its Secretariat has just transferred its headquarters from the rather dingy hotel in which it was housed on the hill behind Geneva to a simple but finely designed building on the edge of the Lake of Geneva, where its white walls and numberless windows look across at the per-

petual snows of Mont Blanc.
The International Labor Office was created by the Treaty of Versailles, one of the most successful accomplishments of that muchabused instrument. The peace treaty declared that inasmuch as the League of Nations had for its object the establishment of universal peace and that such peace could only be established if it were based on social justice, a permanent organization representative of governments, of employers and of workers should be established at Geneva to try to bring about certain ends which would contribute to that social justice. These ends were summarized as being the regulation by international agreement of a maximum working day or week; the abolition of inhuman or insanitary conditions of work especially for women or children; the provision of adequate living wages; the abolition of unemployment; the encouragement of vocational education, and so forth, by simultaneous action all over the world.

The main idea behind the organization of the I. L. O. was that in the modern world business competition is becoming more and more international in character; that bad standards of work and efficiency in one country tend to produce similar conditions in other countries; that excessively long hours or excessively low wages in one land tend to lengthen hours or lower wages in other lands, and so on. Hence its organizers came to the conclusion that, just as the workers in each country attempt to prevent the competitive reduction of wages within its own boundaries by establishing uniform national rates, so the tendency of competition to drive down wages could be prevented internationally by securing through international agreement certain uniform minimum standards below which no country should allow its industrial conditions to fall. Thus not only would more progressive countries be protected against the competition of sweated labor in backward countries, but the human standards of life and comfort would tend to be progressively raised all over the world.

The work which is being done by the I. L. O. is clearly shown by the subjects considered in its first meeting in its new home, which mainly dealt with the conditions of labor in the Orient. It was shown that, largely through its intervention, the hours of work in India have been reduced to sixty a week, that night work there for women and children has been prohibited, and that the minimum age of half-timers has been raised from nine to twelve, while all workers are to have one day's rest in seven. In Japan the minimum age of employment has been raised, night work for women and children will be prohibited after three years, and further salutary labor legislation is promised at an early date. China has also promised to take action in the same direction as its governmental disorder disappears.

These steps may not seem to be striking to some people, but they represent a great advance on some of the conditions which existed before. The conference also agreed to simplify and make more effective the regulations for protecting migrants in their travels from their old countries to the lands of their adoption, and especially for the protection of unaccompanied

women and children. The I. L. O. consists of a general conference of delegates, comprising representatives of the governments, the employers and the workers of the member states, which meets occasionally; of a governing body of twenty-four persons, also representative of governments, employers and workers, which meets at regular intervals, and of a permanent secretariat which prepares the work for the representative bodies. It has, however, no legislative or executive powers of its own, and no nation can be bound by anyone but its own delegate and with its own consent, But the I. L. O. has done an immense amount to uplift the working conditions of humanity all over the world, and its activities are worthy of the interest and support of all who wish to see a world in which there is more prosperity and a better distributed prosperity than there is

Recent deplorable mishaps on some of the best equipped railway lines in the United States seem to have again directed the thought of Perfecting

Devices

those responsible for the safety of the travel-ing public, as well as that of the public itself, Train Control to the much-discuss

subject of automatic train control. Despite the fact that devices which are declared to

the fact that devices which are declared to insure virtually complete protection against collisions between trains have been measurably perfected, carriers have delayed their installation, largely, it is claimed, because of the great cost which would be incurred.

It will be recalled that under the provisions of the Transportation Act of 1920, Congress authorized the Interstate Commerce Commission to remaine any relivend applicant to the terms of the act to install automatic train-stop or train-control devices complying with the requirements prescribed. Two such orders have already been insued, the first specifying forty or more roads in a single group, which were directed to equip at least one division each with

such devices. In a second order, later temporarily held up, similar installations on a group of additional roads, as well as on the first forty, were directed.

The enforcement of these orders has been persistently opposed by the carriers. The item of expense, counted in dollars merely, is one which it probably was necessary for the roads to reckon with in the years during which their economic budgets were balanced with difficulty. But it would seem that the time has now come when, instead of opposing the provision that these precautionary steps be taken, the managers of even the larger systems should willingly accede to what undoubtedly is a popular demand. That definite steps are being taken in the desired direction is indicated by the announcement recently made that the Boston & Albany Railroad Company has installed an approved system of this kind on its lines between Boston, Mass., and Rensselaer, N. Y.

The time will come, no doubt, when the absence of such equipment on all tracks over which passenger trains are dispatched will be the exception. Looking back, it is easy to recall the time when there was opposition to the installation of the air-brake, now a part of the equipment of even the regular freight trains. It would seem a vain subterfuge to insist that the cost of any device which will reasonably insure against disaster is too great. The human element today constitutes perhaps the greatest hazard in travel by land, whether by railroad train or automobile.

Without questioning the fact that Muscolini has accomplished many remarkable reforms in Italy, it is interesting to learn that a similar political coup to the one which he successfully staged in Italy failed recently in Denmark when a certain Cornelius Petersen attempted to overthrow parliamentarism there. A signifi-cant feature of the situation in this case is to be found in the fact that the effort was nipped in the bud largely because no one took the man seriously, and doubtless this was itself almost entirely due to the national realization of the inconsistency of an imitator of Mussolini trying to make himself heard in a country so free politically as is Denmark. Maybe Petersen was not equipped with an executive power as extraordinary as Mussolini has proved himself to possess, but just the same it would seem clear that not only is a dictator necessary in order for a dictatorship to be established, but also a people that is willing to have one established

In his address before the convention of police chiefs of the United States and Canada, meeting

Mr. Hoover Places the Responsibility

in Chicago, Secretary Hoover, of the Department of Commerce in Washington, discussed at some length two important present - day problems, crimes and their punishment, and the regulation of auto-

mobile traffic on both sides of the international boundary line. It is significant that he found a close relation between the two subjects. The automobile, as has long been realized, affords to the predatory criminal a means of escape which is coming to be more and more frequently utilized. But the underlying cause of that reasonable complaint which society has lodged against those charged with the responsibility of apprehending and punishing offenders against the law lies, as he observes, not in the frequency of escape from apprehension, but in the failure to impose upon those convicted the inexorable punishment which justice demands.

Secretary Hoover referred to reports of the American Bar Association and the National Crime Commission in verification of the fact that those who are arrested and convicted, in great proportion, escape somewhere in the tangles of the machinery set up for the administration of the law, and that a large part never serve adequately, even though their offenses have been proved. Incidentally he observed, perhaps for the benefit of those whom he addressed, that this was not the fault of the police. It tends, he quite properly concluded, to discourage those charged with the duty of bringing those suspected of breaking the law to trial.

The need, as the speaker saw it, is for a change in the attitude of the courts and the public toward those who wantonly transgress. He urged that steps be taken to strengthen and reorganize court procedure, that the people and the prosecutors transfer what he described as their "maudlin sympathy for the bad man to real sympathy for the people who are injured by crimes against them." It is then, and then only, he insists, that the police can become effec-

tive in public protection. Dealing with traffic problems from an economic standpoint purely, Mr. Hoover made a convincing plea for the enactment and enforcement of uniform laws. He approved the code proposed recently by the National Conference on Street and Highway Safety. While he apparently is hopeful that the problem presented will be solved by account to the problem. be solved, he sought to impress upon his hearers and the public generally the necessity of united action. That it has not already been solved is easily understandable. As Mr. Hoover observes, probably the inventor of the automobile "did not expect to turn twenty million highspeed engines running helter-skelter over our streets and highways; he did not expect one-half the whole adult population of 100,000,000 would claim to know how to drive them with safety and skill."

He accounts, in part, for the disasters on streets and country roads, the sacrifice of 20,000 streets and country roads, the sacrifice of 20,000 persons annually, the maiming of 600,000 more, and the destruction of \$600,000,000 in property—more than ten times the annual losses on the railroads—by that policy which permits any body to drive a more dangerous engine over the countryside at the same speed as a locomotive, and to do it after not more than a 'ew days' instruction. It is his conclusion that the large majority of mishaps result from the carelesaness or inefficiency of a small aumber of drivers, and that the drastic elimination of these and proper regulation of the balance, with certain improvements in traffic facilities, will greatly reduce the yearly toil.

Oftentimes, a glimpse into the home life, into some simple and intimate custom of a land

other than that of one's nativity, quickens a spontaneous and sympa-Dolls thetic interest which long periods of formal and exchanges might not awaken. One such Amenities charming picture is summoned, in the de-

scription of a springtide custom in Japan, where, it is said, the people have a Festival of Dolls on the third day of the third month of each year. On that day, it is explained, each family brings out a set of dolls, accumulated by the several preceding generations; and the little girls and the older ones, dressed in gala costumes, exchange visits and share the pleasures which only doll owners can fully understand. One of the objects of the festival, apart from the simple happiness of the occasion, is, apparently, to give to the girls of Japan useful hints on becoming ideal housekeepers and home-makers.

An especial interest is lent to the festival to be held next March, by the fact that American children are to have a part in it, by sending properly equipped doll envoys to present the compliments of the young Americans to the doils and the girls of Japan, according to Mrs. Jeanette W. Emrich of Washington, secretary of the Committee on World Friendship Among Children, sponsoring the affair.

One thing, thus, seems certain: when little friends across the seas are encouraged sympathetically to respect one another's customs and to share their happinesses, these potential housekeepers and homemakers will one day help their contemporary grown-up brothers to remember and to guard happy envoys of peace. And if puppets can aid in perpetuating interna-tional amenities, one wishes bon voyage to what it is hoped may be a large assortment of dolls!

Who would have thought but a decade or so ago, that the much-despised steerage of trans-

of the

atlantic liners would be elevated to the place where it would be re-The Evolution ferred to by a professor of a large American educational institution as "styl-Tourist Cabin ish and intellectual"? Yet such is the case, for

Prof. Edward A. Steiner of Grinnell College, in Iowa, so designates it in recent letters from Prague, where he and Mrs. Steiner are guests of the Czechoslovakian Republic. In fact, he goes further than this in adding: "It is now called the tourist cabin, and is the wide-trousered, high-brow end of the boat. with more Phi Beta Kappa keys than hairpins." Even more, he urged that there were enough professors in the steerage to start six colleges, whereas the second cabin contained enough contractors to build a tower of Babel, and the first cabin, enough brokers to float the stock!

And Professor Steiner writes as one knowing whereof he speaks, for when but a lad he came to the United States as an immigrant boy in the steerage, and since that time has made a number of trips in connection with his studies of immigrant problems. One does not need to be an authority upon this question, however, to appreciate the changes that have taken place. From being a section of the vessel that was looked down upon as being almost beyond the ken of the ordinary traveler, it has become, with the increase of prices of ocean travel, the only portion of the ship that many a would-be voyager could stretch his purse to hire. And after all, what does it matter where one sleeps if one's conscience is clear and one is happily environed

The evolution of the steerage provides a striking example of the molding of a supply to a demand. The proverb, "Necessity is the mother of invention," but half tells the tale. When demand becomes sufficiently insistent it finds a way out inevitably. The average college professor, had he been asked fifteen years ago whether he was going to travel third cabin, would have regarded his questioner decidedly askance, as if disbelieving his ears. But today the amenities of the situation are such that he travels in comfort therein and takes it all for granted. How true it is that circumstances alter

### Random Ramblings

Woman's proclivity to beautify whatever she touches is shown in the plaint that the utilitarian smock has been seized on, and its crudeness softened and mel-lowed till now it is being made of silk to sell at about \$15. Soon they will need something to protect the

Perchance the present is a fitting time to answer Sydney Smith's inquiry of the early eighteenth century: "In the four quarters of the globe, who reads an American book, or goes to an American play, or looks at an American picture or statue?"

Most of us may be likened to a radiocasting station, as we are constantly sending out messages, with no exact knowledge of just how far away they are being received. It, therefore, behooves us to put of a con-sistently excellent program.

Samuel Johnson seems to have had the right idea when he wrote that "abstinence is as easy to me as temperance would be difficult." Advocates of light wines and beer might well take notice.

Growing mushrooms in the underground cellars of former wine company in Missouri is just another satance where prohibition turned a destructive in-ustry into one that benefits mankind.

news item says that the English Channel swim from France this year. It does not matter so where it starts. It is where it ends that counts.

### Miss Camilla Lights Her Lamp

THERE was always the hope that Miss Camilla might stay for Sabbath evening supper and spend the night.

To be sure, Miss Camilla had never yet accepted an invitation to stay, but in her very refusal lay the kernel of a mystery which intrigued my childish interest. Aunt Sarah often stayed for supper. Miss Maria White, often

But neither of these guests engaged my fancy.

Aunt Sarah's conversation was punctuated by long silences, and that, too, in a day when punctuation marks were most abundant. Miss Meria was a village seamof the old school who was invited out frequently of a Sabbath by way of relieving the tedium of her iong, busy week. Her conversation ran in a gentle, inoffensive monotone, as neat and precise as her own seams; busince her tongue was as slow as her needle and she paused

since her tongue was as slow as her needle and she paused at the end of every seam, so to speak, to stay her thread or pull out a basting, it soon lost its charm.

After the first half-hour, indeed, I usually slipped out into the summer kitchen, where I was permitted the hilarity of playing tunes on the "comb"—providing only that they were "hymn-book" tunes.

Miss Camilla's coming was different. I can remember how eagerly, toward the close of a long Sabbath afternoon, I used to watch for her through the heavy lace curtains at the parlor windows. The morning had gone

curtains at the parlor windows. The morning had gone swiftly enough—what with getting off to Sabbath school with long, wet curls, a penny laboriously polished upon the Brussels carpet, and a small black Bible from which there depended large satin ribbon book-marks terminating in chenille balls.

But the afternoon had been long. The anticipated walk to the woods had been given up because of a brief summer shower; the autograph albums had been examined, and reexamined—and, if the truth is to be told, left richer by the addition of a penciled outline of a chubby hand with name, date and year painstakingly inscribed in the center

From the restless, revolving stool of the old square piano, the hymn-book had been played through, sketchily, at least once; and the tiny sparrows which crowded the But despite these diversions, one was almost at the break-ing point. If Miss Camilla would only come!

And then, suddenly-"Grandmother, I can see Miss Camilla turning down River Street in her changeable silk dress!" Grandmother arose, with decorum, smoothed her already flawless hair on each side of the part and shook

already flawless hair on each side of the part and shook out the folds of her gros-grain silk. "Go, child, to meet her. Set her parasol in the hall." As I sprang to obey, grandmother drew aside the curtain never so little and I heard her sigh and say: "Poor Camilla! To think she was once the prettiest girl in the county!"

Miss Camilla duly made welcome, I drew my small chair as close as politeness—and grandmother's lifted finger—permitted me. I gazed earnestly up into Miss Cami'la's face. Just why should she awake in me such a delicious sense of romance? For she was just an old lady, like the rest, with snow-white hair, faded blue eyes—but with a twinkle, to be sure—and soft, flushed cheeks which must once have been like rose-dawn or rose-petals in their delicate pinkness; mouth, very gentle, but with lips shightly compressed as though they held back a secret, bitter sweet; hands, slender and shapely still, and lying impassively in her lap as if they had grown accustomed to "waiting."

"Waiting!" Ah, that was the source of the glamour. Miss Camilla's very presence held the suggestion of "waiting." I had heard grandmother and Aunt Sarah talk about it in low, ladylike tones as though, despite their lifelong friendship, they had no right to enter Camilla's holy of holies. They had said—come closer and I will tel you—that Miss Camilla had once a sweetheart—who wen:

you—that Miss Camilla had once a sweetheart—who went far away—and never returned!

Some said Mexico—and in those days they might as well have said Mars. Others, California. If the latter, they he must surely have struck "gold." And if he had struck "gold," then he might one day, even "now." I thought, after forty years or more, come back in great splendor and take Miss Camilla away with him.

How would he come? Perhaps like some prince or knight of old, in coat-of-mail or other shining garments I liked to picture him flashing upon the dull background of Miss Camilla's life after the manner of Sir Lancelot—"gemmy bridle glittering free"—and his "helmet and the helmet feather burning like one burning flame together." Engaged in such delectable reveries, the conversation of

the two old ladies flowed softly by, unheeded. What cared what they were discussing. It was all mere words, Snatches of:

'Did you care for the sermon, Justine?" "It was quite earnest, my dear, and he is still so

"Mrs. A— was out today." "Run along, child, and bring Miss Camilla a fresh drink from the cistern."

Slowly I obeyed. It was not that I cared particularly for the conversation. But I did not wish my dreams broken in upon. As I pumped the water, my thoughts ran on and on. When "he" came—this fairy prince of Miss Camilla's—would he still want his lady love?

In my fancy, the man himself was always young and fair, as if along with the "gold" he had found also the fountain of youth. They had quarreled, some said, because Miss Camilla had refused to leave her parents and accompany him upon his wild adventure. Miss Camilla had been a good and dutiful daughter. But now that she was free, why, oh why, did the wanderer not relent and come for her?

Twilight gathered in the big, already dusky parlos. Miss Camilla arose to go.

"Now, Camilla," interposed grandmother, "you must stay for supper and spend the night. Just a cold supper, to be sure, but you must eat it with us—" Miss Camilla paused in the act of drawing on her silk mitts.

I leaned forward, timid, but very eager. Perhaps an added entreaty—

added entreaty—
"Oh, Miss Camilla, if you'll only stay. We use the best china on Sabbath evenings, you know—the set with the moss roses as tiny and shaggy as the ones in your very

Miss Camilla smiled slowly-wistfully, I thought. She appeared almost to hesitate.
"Come, now, Camilla," grandmother insisted, with as much pressure as was deemed good form, "it's only habit, after all, that takes you back home. You were faithful

for so many years—"
Miss Camilla's smile faded into a line of marked declsion. "No, Justine, I must go. For, you see I lighted a small lamp before leaving—so that I need not go into a

Grandmother laughed a low, understanding laugh. "Ah, Camilla, you with your lamp! I declare I believe you Camilia, you with your lamp! I declare I believe you light it on purpose to excuse yourself from my invitations. But if you feel you must go— Run, child, and bring Miss Camilla a jar of the quince jelly."

Again my footsteps lagged. No Miss Camilla at the supper table. No Miss Camilla throughout the soft, sum-

Again my footsteps lagged. No Miss Camilla at the supper table. No Miss Camilla throughout the soft, summer evening, her gentle voice merging with grandmother's into a warm, pleasant stream on which I might drift—all unintentionally—off to sleep.

Back into the parlor in time to hear grandmother say, "Yes, Camilla, we shall be glad to come. On Thursday, at five? But mind you, Camilla, I too shall light a lamp before I come—"

On Thursday, at five! Why, that must mean supper at Miss Camilla's! Inward joy! Miss Camilla had fruit plates of which no two were alike. Miss Camilla had ripe raspberries, and currants, and cabbage reses. And, who knows, I might even learn if Miss Camilla had a particular kind of lamp to put in the window—and if it were, perghance, a signal, a beacon, a welcome. I might find "his" picture in the album, with a "Fondly thine" in fancy script to identify it! He might—oh, fascinating prospect!—come riding up for Miss Camilla and whisk her away before our very eyes!

The hall door closed behind our guest. "Poor Camilla," sighed grandmother, and began taking down the plates with the moss roses.

Some years later, while I was in college, I had a letter from grandmother in which I came across the familiar words: "Camilla came late this afternoon—Sabhath—

Some years later, while I was in college, I had a letter from grandmother in which I came across the familiar words: "Camilla came late this afternoon—Sabbath—and stayed—" Here I was obliged to turn a page and you may be sure I did so with somewhat of the old thrill. Did Miss Camilla really stay for supper and spend the night? Did she? I turned the page with eager fingers—"and stayed—until dusk." I could see Miss Camilla, with her thin, slightly stooping figure, making her way slowly along the street—where the lilacs must have brought back many an unbidden memory—down to the old, gray house in whose window, I had no doubt, the lamp was still burning.

### The World's Great Capitals: 'The Week in Berlin

A WEEK-END trip from Berlin to Ruegen (a charm-ing island in the Baltic Sea) and back for twenty marks, including all expenses, is the announcement posted up in a leading department store here which is organizing these trips in conjunction with the manage-ment of the seaside resorts on the island. This amount, equaling about five dollars or one English pound, include the railway fare, third class, by fast train to Stettin and back (about 160 miles), the steamer trip from Stettin to Ruegen and back, lasting twelve hours, breakfast on board, lunch and tea in Binz, on Ruegen, where the participants stay six hours, all tips and the fees for bathing in the sea and going on the pier. Hundreds of persons already have availed themselves of this singular opportunity to spend a day at the seaside. Despite the very low price, the organizers do not lose any money, as the participants use the cheap special holiday trains, while in Stettin they board the regular boat which, rather than going partly empty, takes them along at lower rates. The restaurant owners finally reckon with the mass of visitors, which makes cooking less expensive, while the management of the seaside resorts hopes that some of the participants will return in later years. In this manner all expect to benefit by these trips in some way or the other.

A bus carrying a newspaper for its passengers is the latest traffic innovation of Berlin. It is the so-called latest traffic innovation of Berlin. It is the so-called Express of Luxury Bus, connecting the bourse with the fashionable West End, traveling most of the way through the beautiful Tiergarten, avoiding all crowded thorough-fares and cutting off as many corners as possible. In this way it is able to reach Kurfuerstendam in the west in fifteen minutes, as compared with half an hour needed by other busses for this distance. It is equipped with very comfortable seats and has no deck. The fare is fifty pfennigs and one mark, according to the distance traveled, or from two to three times as much as on the ordinary busses. The latest edition of one of Berlin's leading newspapers is always hung on its walls for anyone to read on papers is always hung on its walls for anyone to read on his way to the office or when returning home in the evening.

The sales are once more attracting huge crowds to the principal business thoroughfares of Berlin, and at times it is scarcely possible to walk on the footpaths of Leipsiger Strasse, where most of the principal stores are located This summer the stores have resorted to flying flags of the most fantastic design from their windows and roofs in order to attract the public, and walking down the gayly decorated streets one involuntarily asks oneself what festivity is being celebrated. The most up-to-date way of inducing the public to step in is a poster outside one shop announcing its prices are lower than in Paris. Prices, as usual, have been cut down considerably, but the public on the whole is still very reticent, as wages and salaries are far too low in comparison with the high prices in this country. Thus, as at previous sales, there are many who crowd around the windows and counters, but only few who buy.

The population of Berlin, after an interfal of about ten years, is once more paying prewar rent for its apartments and offices, owing to a decree just published by the Gov-

ernment of Prussia raising the rents to 100 per cent of the peace rates. Rents were the last of the countless things under the control of the Government since the early stages of the war, when the state fixed the prices for all commodities, thereby involuntarily expelling them from the market. Step by step free competition was restored after the war, but rents were still kept artificially low by the state in order to meet the economic distress of the people. This condition, however, has not changed; wages have remained low, while prices have soared until they almost reach the level of prices in America. The new increase of rent, which has been a gradual one, is there-fore calculated to add to the hardships of the working population. It will have the one advantage, however, that it will spur the building activity and thus help to solve the present housing problem.

the present housing problem.

The improvement of the Berlin airdrome on Tempelhof The improvement of the Berlin airdrome on Tempelhof Field is progressing rapidly. The chief aim has been to separate the incoming and outgoing air traffic and to keep the buildings for the management and for the housing of the airplanes apart from those used by the traveling public. In future airplanes will start on one side of the wireless station and land on the other. A large restaurant and waiting rooms are being built alongside the "quai"—a concrete platform of 150 meters in length, where the passengers "embark" and "debark." Toward the rear is the building containing the offices of the management, which will also include the hall where the passengers and their luggage are attended to. A new hangar 208 meters in length is also under construction which is able to house twenty airplanes of the large three-engined type. The two doors, each forty-four meters in length, can be folded with the help of electrically driven pulleys until they are only four meters long. This has been made possible by the invention of a German engineer. A new gasoline station has been added, so that 160,000 liters of gasoline are at the disposal of the airplanes daily.

Letters to the Editor Brief communications are ordered, but the additor must remain an a pulse of their continhisting, and he does not undertake to haid binned the this new spaper reasonable for the facts or against greated the fact many letters are destroyed unread.

Amending the Constitution of the United States

To the Editor of THE CHRISTIAN SCIENCE MONITOR:
Recently I have been reading "The Government of the
United States," by William Bennett Munro, professor of
municipal government in Harvard University. In taking
up the question of amendments to the Constitution, Professor Munro writes on page 87 as follows:

Is the constitution hard to amend? Many people that it is.—When public sentiment 2 strongly mobile behind a proposed amendment there is surprising the similar to the figure of the figu

This considered and thoughtful statement of a recognized authority on public and political affairs should go far in proving the fallacy of the oft-repeated statements of the wets that the Eighteenth Amendment was not the will of the majority of the people.
